Your Health Care Rendezvous Point

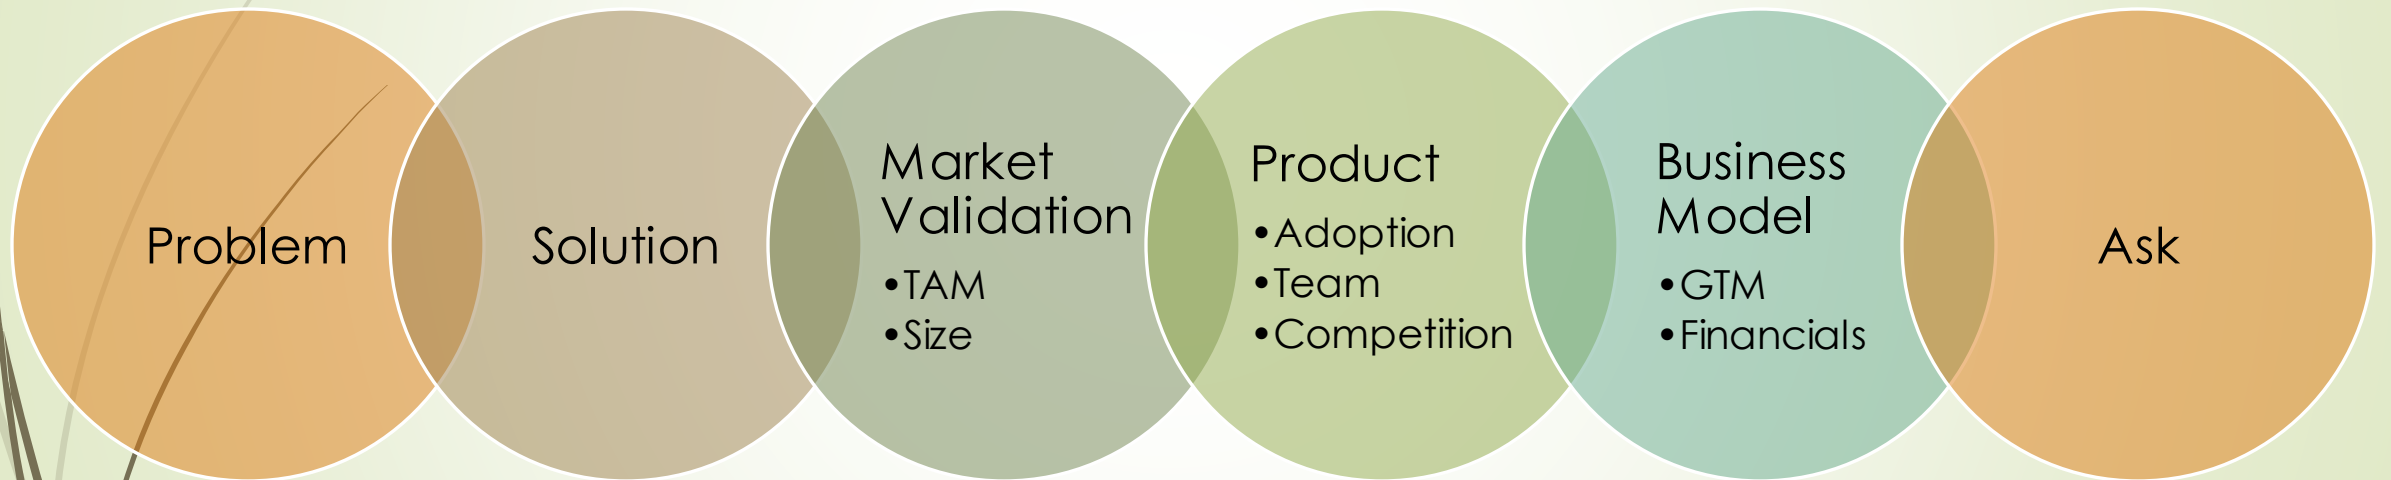

This Document explains - Why, What and How we are addressing Healthcare for insured, uninsured and below poverty Americans

– UNDER NDA WITH BENCHPEDIA LLC

Benchpedia LLC - PingDoctors®

What is PingDoctors®

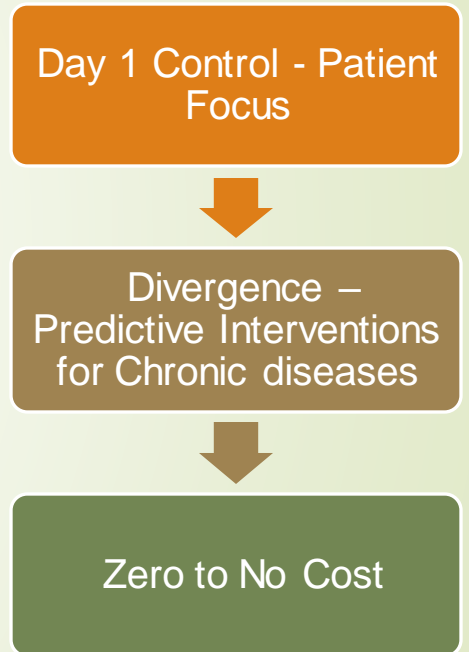

PINGDOCTORS is Healthcare Platform (Online and Mobile) offered by BenchPedia LLC. This is a HIPAA compliant Integrated HealthCare System helping Patients (especially Underprivileged/Non Insured) driving Preventive Care and Interventions using Big Data and Artificial intelligence.

We use a Active Health plan and connect to Doctors, Health providers, Hospitals etc. at any time, anywhere (Like Free Clinics, Doctors offices , Mobile vans, At Home Services, In store kiosks, Bus stands etc.)

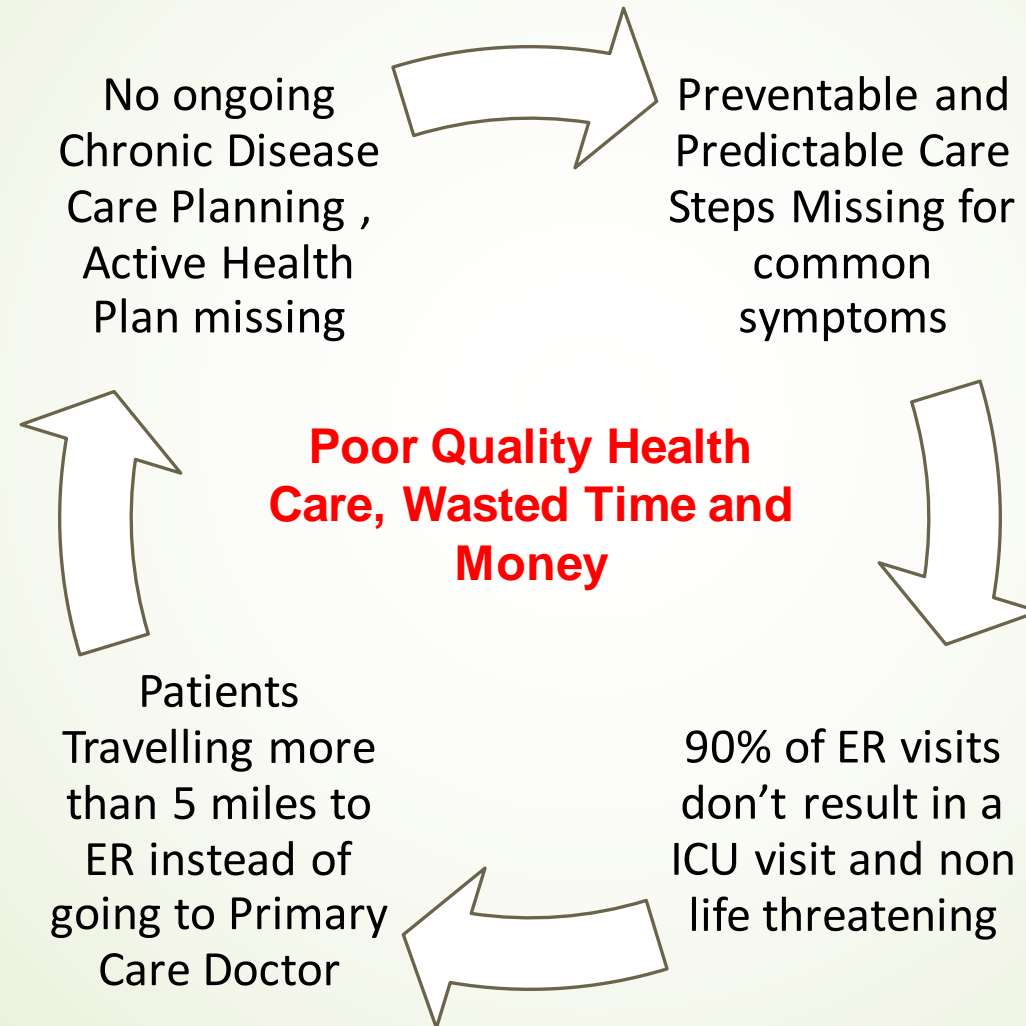

Empowers users to Lead a Healthy Lifestyle and Prevent unnecessary ER visits.

VISION

Better care experience, better population health, lower cost and become de facto platform for Patients and Healthcare providers in USA in 2-3 years.

Systemic Healthcare Problems

Problem Statement

Patients Try to get Preventive Healthcare and Ambulatory care for Common Symptoms and Chronic diseases but nearly 21% below poverty level lacking personalized preventive active healthcare plan. Low quality of life, out of pocket expenses and Unnecessary ER visits.

Lack of Patient History and Encounters linked to a Care Plan, Primary Medical Care Needs, Primary Care physicians and other health resources. Transportation difficulties, limited health literacy, lack of fluency in English, low income level and low education level

Appreciation of epidemiological factors, Lack of Community resources, Ability to recognize patients unexpressed needs and Lack of Patient Advocacy. 13% Americans don't have health insurance and Go to ER for lack of primary care.

Solution for Present and Future

Preventive and Predictive Healthcare Platforms (Online and Mobile using Human and Artificial intelligence) helping Patients and Health care providers (especially Underprivileged/Non-Insured/Indigent) driving immediate to long term chronic needs.

24 hour
Doctor

Immediate healthcare needs, Take Preventive actions, Aggregated History/EHR to maintain Quality of health.

On-Demand
Smart
Intervention

Drive Big Data and Artificial intelligent driven smart Interventions to help pre-connect to Doctors at any time, anywhere preventing ER visits/Urgent Care with integrated Ecosystem of Predictive Services at Home , In Store kiosks

Preventive
Lifestyle
Services

Active Health Care Planning with Clinics, Doctors offices , Mobile vans. Reduce Out of Pocket by Programs helping in Preventive Lifestyle

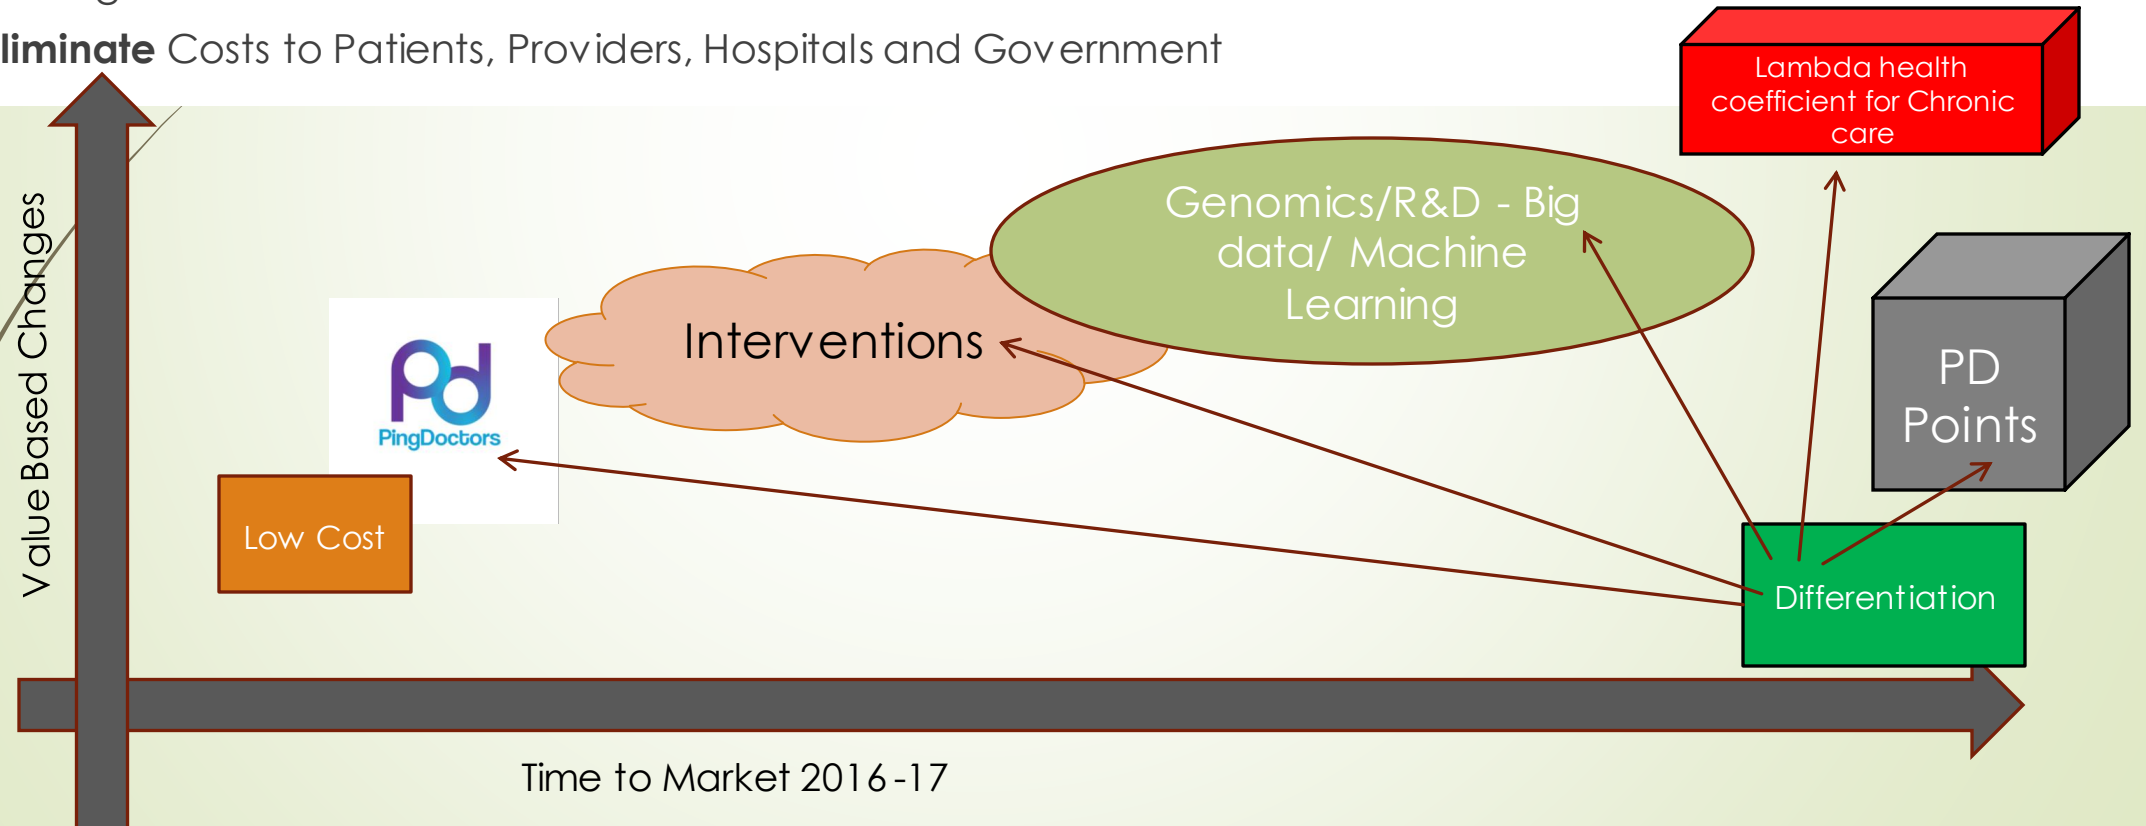

Family Health Ring

- ▶ **Family health ring** gives 360-degree control on preventive care, health cost and focused care for loved ones using the **Health index** from routine care to Chronic health disease. We pull all your family records from EHR, your Doctors, Health Care devices, Apps etc. once you give us consent upon signing into PingDoctors to help build a Family health ring.
- ▶ <https://benchpedia.com/blog/f/what-is-a-family-health-ring>

Patient Value Creation with Blue Ocean Strategy

- **Create Family Health Ring** as part of Patient Health management and stickiness with value based innovations for a Patient.
- **Raise** PD growth and Population Connectivity using Technology and Adoption of Health Analytics.
- **Reduce/Control** Patient's Lambda Health Coefficient for Common Symptoms and maintain for Chronic Care Management
- **Eliminate** Costs to Patients, Providers, Hospitals and Government

Personalized and Proactive Care

Personalized Patient Intervention Triggers, Active Health Plans and linking Health care per your needs on Demand using Family Health Ring

Personal Active Health Planning robot to keep track and Monitor your ongoing medications/symptoms/history Linked to Lambda Health Coefficient for Health status

Give you a preventive approach for healthier lifestyle using a Health score created using combination of factors like Demographic, Out of wallet, Poverty level and Accessibility of Health care Services/products.

Non Insured / Indigent and Insured Patients Clinics, Payer and Hospitals to Improve Population health, Reduce Costs and Aggregated Patient data, preventing unnecessary ER, Doctor Visits and Lab tests etc.

We are focused on the 33 Million non insured/Indigent and \$45 billion target niche market. Creating value for patients using PD Points that can be used for Services on demand

Adoption Strategy based on Value

The Team

Prashant Arora Allahabadi
Founder and CEO

Prashant@benchpedia.com

Prashant is Founder and CEO at Benchpedia driving Technology Architecture, Product Roadmap with Data Sciences for different digital platforms at Benchpedia.

Product leader with Solid Data Science, Software engineering background working in Health care and Technology Companies like Dell , PPD inc and Cox Automotive.

Master in Computer Science from University of Texas and Electronics Engineer. Experienced in GTM, Sales, Product Strategy, Marketing, OEM, Engineering, Supply Chain, IT in Technology.

Prashant has worked in Pharma drug research and managed teams in Phase I to IV Drug Discovery Pharma R&D. As part of Clinical research R&D People Manager, PPD Inc. Covering Oncology Lymphoma NOS, Mental Disorders like Schizophrenia, Major Depressive Disorder etc.

Dr Karandeep Singh
Chief Medical Officer

DrKarandeep@benchpedia.com

Dr. Singh is Chief Medical Officer of Benchpedia with extensive experience in cardiology He advises the models we create and validates the outputs before we share with patients. He is also leading the workflow for patients and providers for PingDoctor platforms.

Very active in implementing epic at Geisinger Medical Center, Danville PA and Cerner at dignity health .

He was senior resident in postgraduate Institute of medical education and research (PGIMER), Chandigarh. India. Member of Royal College of physicians, Edinburgh, the oldest and perhaps the most prestigious of the Royal College of Physicians. He worked as a registrar in England and still maintains his MRCP. In the United States, he obtained his residency at prestigious Texas heart Institute Houston Texas and has been Member and faculty reviewer for American medical informatics Association with presentations along with UCLA students at the National American medical informatics Association meetings.

Vishnu Datla
Investor and Advisor

Vishnu@benchpedia.com

Vishnu has diverse management experience in SaaS, Operations, IT, cross-boarder teams & general management. Vishnu founded AutoRABIT after his experience and the challenges he saw with large enterprises struggling with IT operations.

Prior to AutoRABIT, Vishnu was the founder of TechSophy, a technology company focused on ERP & BPM services. Before TechSophy, Vishnu held several management & leadership positions in several multinational organizations across US, Australia and India. Vishnu is astute in building cross-boarder and global teams during his career.

Competition

PINGDOCTORS[®] has segmented competition in 4 different areas include Zocdoc (for patient to doctor connect), Patient fusion (cloud patient management system), IBM WATSON (Machine learning and Big Data services) and Herbal/Ayurveda Medical Products.

Our integrated system has advantage over each of these as we have architected it to be a secure HIPAA compliant and simplified Integration of all above features that are personalized driving patient focus delivery system and giving clinics, Doctors and Patients a unified ecosystem of services (Free or On Demand).
