

Okanogan Youth Bass Fishing Club

Topic: Building a “Livewell”

When fishing tournaments, you must have a way to keep fish alive and healthy for the entire tournament. After “weigh-in”, the fish can then be released back into the water safely. Adding a “livewell” to your small boat is easy and pretty inexpensive.

At our next meeting, we’ll be building a livewell. At the end of the meeting, one lucky club member will win it!

(We will teach you how to build one and provide you with a materials list so you can make your own at home).

Topic 2: Spring Smallmouth! If there is time, we’ll be talking about some great Spring smallmouth bass techniques to try on our local lakes! Might even be some tackle giveaways 😊

When: Wednesday, April 12th at 6:00 P.M.

Where: Okanogan High School Library

It is VERY HELPFUL and very much appreciated when members RSVP to events so we know how many to expect. If at all possible, please make it a habit of RSVPing to all youth club activities by sending an email to

jbrown@oksd.wednet.edu
