# DISCLOSURES

AMP Wealth Management products and services are subject to general market risk and risks related to currency fluctuations and economic conditions. The underlying investments can fluctuate in value resulting in a loss of principal. No tax implications are considered when making investment decisions.

The **EcoMatrix**® Score and Recession Probability Charts are shown for informational purposes only and should not be considered investment advice. The scores and data shown are derived from proprietary algorithms and are not indicative of the performance of any specific economics, markets or investments. Using any graph, chart, formula, model, or other device to assist in deciding which securities to trade or when to trade them presents many difficulties and their effectiveness has significant limitations, including that prior patterns may not repeat themselves continuously or on any particular occasion. In addition, market participants using such devices can impact the market in a way that changes the effectiveness of such devices. AMP believes no individual graph, chart, formula, model, or other device should be used as the sole basis for any investment decision and suggests that all market participants consider differing viewpoints and use a weight of the evidence approach that fits their investment needs. Investments offering the potential for higher rates of return also involve a higher degree of risk. Past performance is never a guarantee of future results. AMP Wealth Management makes no predictions, representations, or warranties herein as to the future performance of these portfolios.
