Course Description: Become a certified Instructor in life-saving skills with our comprehensive training program. This course integrates first aid, safety education, and the Stop the Bleed initiative, focusing on injury prevention and emergency care for accidents and sudden illnesses. CPR certification includes techniques for adults, children, and infants, meeting the Medical training standard set by IL House Bill 3653.

In this 8-hour training session, officers will not only acquire essential skills but also learn effective teaching methods to disseminate knowledge within their departments and for the MTU. The emphasis is on equipping officers to sustain life for 15-20 critical minutes until advanced medical help arrives.

Join us in making a difference – this training has the potential to save lives, whether it's a civilian, a colleague, or even your own. In moments of crisis, law enforcement officers are often the first responders. MTU 13 takes pride in empowering officers with the expertise to handle such situations effectively.
