

FOOD SAFETY INNOVATION

**ABS Food pans and airtight containers**

## ABS Food pans and airtight containers

Line of airtight food pans made of ABS, a BPA-free alternative to polycarbonate, providing high impact resistance. The highly transparent blue colour still enables the contents to be seen, to quickly identify foods and their state.

**Built-in label to comply with traceability regulations:** Reg (CE) n.852/2004 Reg (CE) n.178/2002. The Permanent label enables professional chefs to identify contents and keep information on the food origin, thus helping to comply with Traceability Regulations Reg (EC) 852/2004 and Reg (EC) 178/2002 regarding food

**Versality:** Smart design enables one container to be used to cover another. It is possible to close one container with another to adapt to the capacity required at any given time. Dual-purpose lid. The lid is also a tray (GN 1/1 and GN 1/2). Just by turning over the lid, it becomes a tray with GastroNorm sizes.

**Airtight:** Optional Bi-injection lid with a rubber seal to ensure maximum protection of food, even in large containers.

**Easy to clean:** Rounded edges: The special design avoids the accumulation of food remains and facilitates cleaning

**Measuring scale:** Measuring scale and GastroNorm size indicator

**Ergonomic:** ergonomic edges make the container easy to handle

**GastroNorm sizes:** Products designed and manufactured according to sizes and specifications established in EN 631.1 standard.
