

Seamless Data Backup + Recovery Without Breaking the Bank

Ensure business continuity and reduce operational costs associated with backing up and recovering data.

Data is constantly growing every year and, in some industries, it's more than doubling. This growth is putting a strain on backup products and the financial budgets of IT managers caught unaware of unforeseen cloud storage costs.

Kreo Solutions can provide a data protection solution that delivers the low cost, capacity scalability and performance that first generation backup solutions can't match. Thank to this solution, you can reduce risk associated with data backup and recovery activities at a significantly lower cost than other solutions.

Key Features:

- 80% less expensive to store data than traditional cloud providers, there are also no fees for egress or API requests.
- Reduce operational costs associated with backing up and recovering data.
- Reduce risk associated with data backup and recovery activities at a significantly lower cost than other solutions.
- Minimizes the requirement for on-premises hardware and allows businesses to realize the benefits of infinite cloud storage.
