Your Data Is On The Line

Over 90% of data breaches start from email, making an end user the number one cause of all data breaches.

Kreo Solutions®

Data breaches not only affect medium and large enterprises, but also small businesses. Personally Identifiable Information (PPI) can fetch a large price on the market such as sales, financial, and proprietary information.

Key facts:

- 86% of ransomware victims had antivirus installed, 65% had email/spam filters, and 29% had pop-up blockers
- 61% of companies suffered ransomware attacks in the past year, with 4,000 ransomware attacks occurring daily.
- 58% of businesses that paid a ransom in the last 12 months did so because the cost of the ransom was less than the cost of the lost productivity from downtime due to the attack.
- 58% of data breaches in 2018 affected organizations categorized as small businesses.
- 55% of US businesses suffered a ransomware attack in the last 12 months.
- 32% of companies lose data in the cloud to accidental or malicious deletion, hackers, and software issues.
