Philosophy	We believe children are innately curious and it is our job to learn and discover alongside them. Together we will learn how to connect with ourselves, nature and each other while also fostering creativity and social emotional development.	An approach that blends components including hands-on activities from Montessori, structure from Waldorf, and daily-life skills from Emily Post's Etiquette, Little Ivy Preschool is founded upon the principle that children do best when they are free to play, learn, and grow. We offer a structured, play-based curriculum.
