# ABOUT WrapRoof

Blue Tarps don't work.  
WrapRoof<sup>™</sup> does.  
As the leader in shrink wrapping  
roof systems, we are positioned  
to support you with our  
competitive licensing program.

# ABOUT WrapRoof™

WrapRoof™ is the inventor of the most effective, and only U.S. -patented, shrink wrap roofing solution available.

Our state-of-the-art product and service is available nationwide, for both **residential and commercial properties**. As the only patent holders of this innovative roofing solution, we provide our clients the highest quality of product and exceptional service - available for all types of roofs.

Currently, WrapRoof™ is **available** for:

- Homeowners looking to install a reliable, temporary roof
- Installers who are looking to provide their clients our service through our licensing program
- Insurance companies, who are looking to best serve residents with a product that meets policy standards

Our roofing system is the most secure temporary roof solution available, warrantied for one year.

## 1 YEAR WARRANTY

We use the heaviest duty polyethylene wrap available & warranty roofs to be waterproof and able to sustain 50 mph winds for one full year.

## ALL TYPES OF ROOFS

- Available installation on flat, low, and steep roofing systems.
- Offer protection for all roofing materials like asphalt shingles, clay tile, concrete tile, metal roofing, slate, wood shakes, wood shingles, BUR, bitumen, PVC, TPO, EPDM

# WrapRoof™ Product

A tried-and-true,  
patented, supreme,  
market-leading product

# PRODUCT

## FIRE RETARDANT

Our plastic is manufactured with a Fire Retardant Material and increased UV polymers that allow us to extend a 1-year warranty against leaks.

## NO SANDBAGS OR HOLES

The material is installed without sandbags, and without adding any additional holes into the roof system.

## FULLY VENTED

The wrap is semi-transparent, and the system is fully vented to prevent mold growth.

## RECYCLABLE

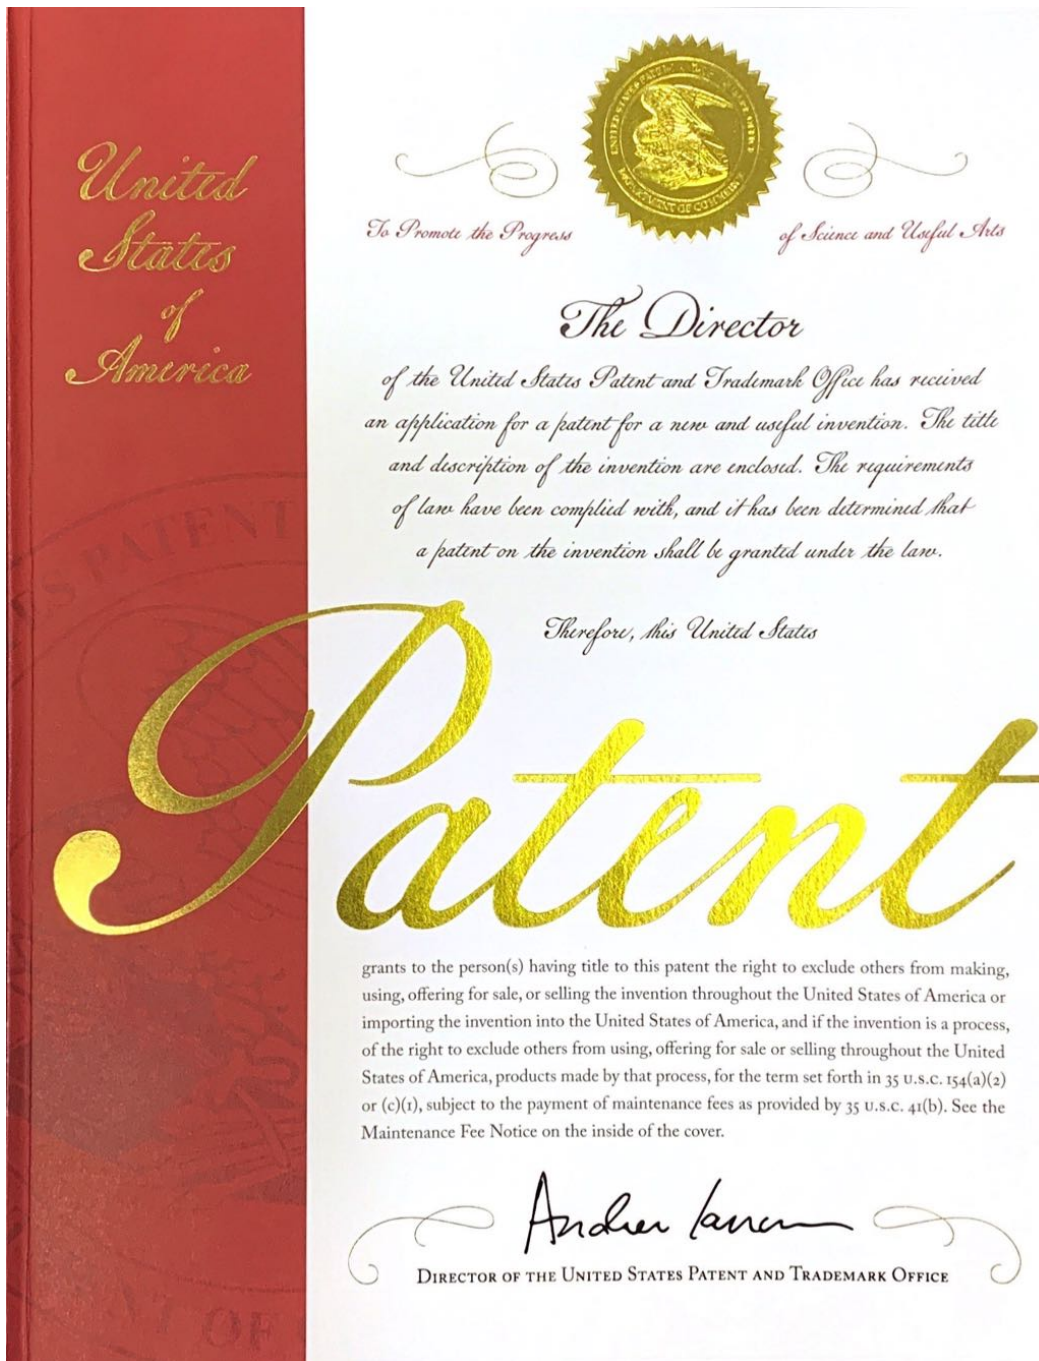

All of our wrap is 100% virgin resin material. It's a #4LDPE (low-density polyethylene) film, that is recyclable.

When multiple rolls are needed, our ground-breaking product welds together to create a continuous impermeable membrane. This also allows us to easily cut back the membrane for inspections, to later heat weld it back together, allowing any remaining warranty to stay in place. It's easy to remove and does not add any further damage to the existing roof system.

# PATENTS

In addition to the 9 claims on the patent included in the link below, WrapRoof<sup>TM</sup> has been awarded 11 additional US patent claims so far in 2020.
