

Leaving Dual carriageway

(Slip road)

Reduce your speed gradually and effectively on the slip road; change your gear to adapt with new speed limit in good time (use Block changing gears if you need to).

Steer smoothly to the left and stay inside your lane on slip road.
Check traffic signs (roundabout, traffic light, junction or give way signs) and new speed limit to plan ahead and get into correct position (Some slip roads have more than one lane and you may need to change your lane for your direction) and adapt with new traffic condition.

Watch for traffic changing their lane to the left taking your exit and acting late.

Use MSM routine, check your centre mirror and signal in good time (when you passed the first exit marker 300 yards) to inform traffic.
Don't reduce your speed significantly and avoid sudden braking.

Look well ahead for traffic signs and plan your exit.
Get into your lane in plenty of time.
