

Roundabouts

Turn Left taking the 1st exit

Cancel your signal after you enter your exit.
Check speed limit, mirrors and make progress accordingly.

Look: look in to roundabout and check for priorities and a safe gap to go. Early observation leads to an early and better decision. Use **LADA**.

Speed: gently slow down and change to 2nd gear, cover your clutch and be ready to stop if you need to.
"Plan to stop, but look to go"

Position: position your car in middle of the lane.

Signal: If it is safe signal left in a good time.
Higher the speed you are traveling, indicate earlier and give enough time to traffic react.
(30 mph speed = 6 or 8 length of car)
(60 mph speed + 300 yards)

Mirrors: check centre and left mirrors to see what is happening behind and look for any cyclist on your left.

Give way to traffic approaching from the right and vehicles are already inside roundabout.
Check other vehicles' signal, position and speed to make a better decision.
