

ACH s.a.r.l

We would like to inform you about ACH Steel, a factory offering a complete line of scaffolding formwork and construction tools to the Lebanese and MENA clients.

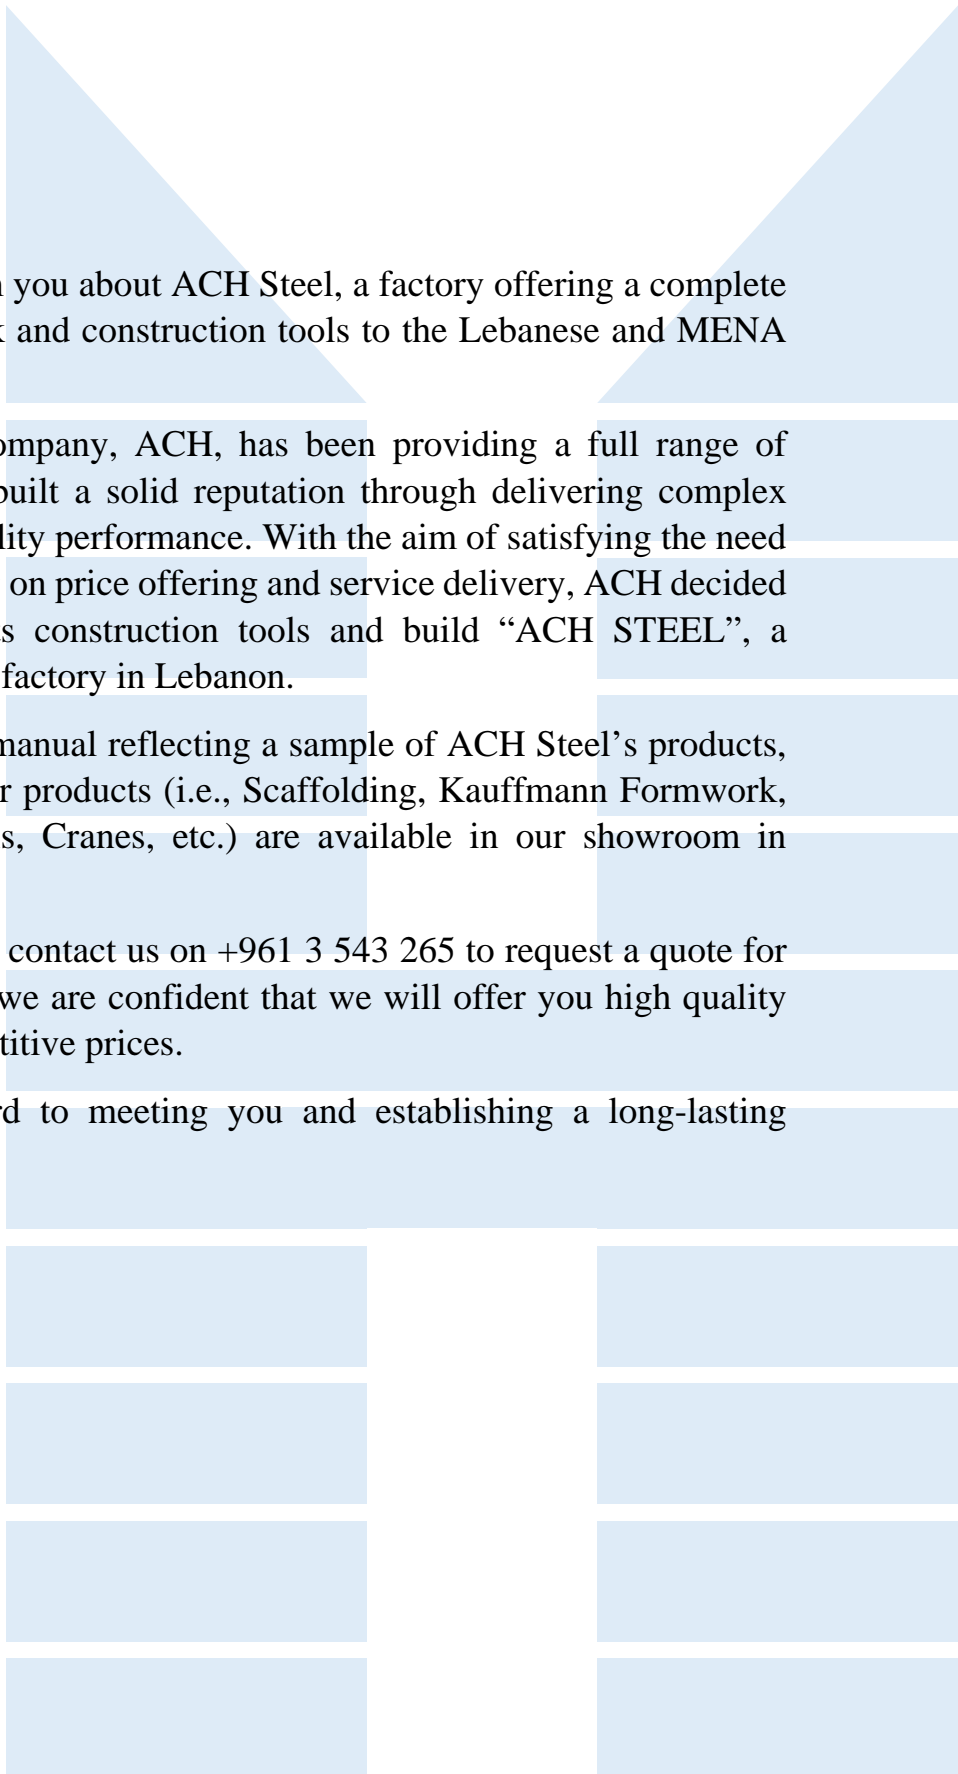

ACH Steel's parents company, ACH, has been providing a full range of scaffolding services and has built a solid reputation through delivering complex projects and ensuring high quality performance. With the aim of satisfying the need of its customers and competing on price offering and service delivery, ACH decided to tailor the production of its construction tools and build "ACH STEEL", a sophisticated scaffolding tools factory in Lebanon.

Attached is a technical manual reflecting a sample of ACH Steel's products, please note that samples of our products (i.e., Scaffolding, Kauffmann Formwork, Concrete spacers, Plastic tools, Cranes, etc.) are available in our showroom in Amchit (main highway).

Please do not hesitate to contact us on +961 3 543 265 to request a quote for your upcoming requirements; we are confident that we will offer you high quality tools while maintaining competitive prices.

We are looking forward to meeting you and establishing a long-lasting business relationship.

Regards

Chutes
