

Styles change,  
but ShowerGuard® glass  
stays beautiful for life.

## Your new shower deserves ShowerGuard glass

Unlike standard shower glass, ShowerGuard glass has a permanent protective layer bonded to the surface when it's made, so harmful residue can't penetrate and cause corrosion and lasting discoloration. That's why ShowerGuard glass comes with a Limited Lifetime Warranty.

### ShowerGuard glass stops corrosion before it starts

- 💧 No trapped contaminants mean no corrosion or lasting discoloration
- 💧 Easier to clean – no special cleaning products needed
- 💧 Your shower stays more hygienic
- 💧 All covered by a Limited Lifetime Warranty

### Clearer glass, lighter bathroom.

ShowerGuard glass is available as either a Guardian Clear or Guardian UltraClear® option. Both deliver the same ShowerGuard glass protection, but the Guardian UltraClear low-iron glass is more transparent – which means it enhances clarity, helps boost light levels and maximizes the impact of your tile design.

## Why standard shower glass doesn't last

Seen microscopically, standard shower glass is porous and open to contamination. Impurities in the water, like limescale and dirt, become embedded in the pores and are almost impossible to remove.

They then corrode and discolor the glass, causing it to 'fog'. Protective films or spray-on sealants will only help for a limited time as they also degrade – and often require specialist cleaners.

### Standard glass magnified

Standard glass is porous, so impurities become embedded and cause corrosion

## How ShowerGuard glass stays beautiful

ShowerGuard glass has an advanced, permanent layer chemically bonded to the glass when it's made. This ensures the surface is smooth, even microscopically, so impurities can't embed to cause corrosion and lasting discoloration.

The patented layer doesn't degrade – which is why ShowerGuard glass comes with a Limited Lifetime Warranty.

### ShowerGuard glass magnified

ShowerGuard glass is smoother and non-porous, so impurities can't embed

## ShowerGuard glass outperforms in tests

In recent tests, ShowerGuard glass showed no signs of corrosion after 9 months of regular exposure to hard water. Competing spray-on products showed between 40 and 85% corrosion over 3 to 9 months.

## Make your dream bathroom a reality

Purchase a shower enclosure  
with ShowerGuard glass from  
a registered ShowerGuard  
glass dealer and you'll receive  
a \$25 rebate. They can also  
help you to register for the  
Limited Lifetime Warranty.
