➡️ FOR IT LEADERS

Expectations have never been higher for IT managers, as the role of IT continues to loom ever larger in the future of organizations. Given the rapidly-increasing changes occurring throughout today's world, the IT manager must be more adept at understanding and utilizing leadership-related skills. The convenience of online learning now makes this opportunity accessible to all IT managers with 1-4 years of experience in management.

This certification workshop, has been **recognized by CIO.com and Indeed.com as a top IT leadership training program.** It is high-energy, high-content, and highly interactive. It also includes access to the exam and one-year access to the IT Leadership Growth Library.

➡️ FOR IT MANAGERS

The ITMLP Certification workshop contains a collection of key IT topics designed to increase the effectiveness of soon-to-be, new, and experienced first-line IT Managers, by:

- Widening their knowledge of IT
- Discussing strategies to maximize user support and satisfaction
- Providing insights into IT innovation and technology trends
- Providing information on the use of various IT best-practices

➡️ FOR IT ORGANIZATIONS

To help IT organizations drive innovation, enhance operational readiness, and compete for world-class technical talent, today's IT Managers must be well trained, organizationally savvy, and have knowledge of IT's leading methodologies, trends, and best practices.

The ITMLP certification workshop is designed to provide IT Managers with the skills and information needed to help meet these challenges.
