

## The Intrix Drawstring Jewelry Pouch for Sterling Silver Elegant for Gifting and Storage

Elegant for both the gifting and storing of smaller sterling silver items such as rings, bracelets or necklaces, the Intrix drawstring jewelry pouch is fully lined with genuine Pacific Silvercloth® and covered with a 100% cotton batik print in muted shades black and brown. Two drawstrings each with a tassel close the pouch.

Pacific Silvercloth® is *not* just another chemically treated anti-tarnish or tarnish-resistant cloth. It is tarnish *preventative* and the only fabric on the market that has thousands of fine silver particles actually embedded in the rich brown cotton flannel to absorb tarnish producing gases *before* they reach the silver thus causing the Silvercloth® to tarnish instead of the silver article. Silvercloth® is always brown because the silver embedded in the fabric tarnishes slightly over time causing the fabric to change to varying hues of brown. It is a true tarnish-preventative and lasts indefinitely while other chemically treated 'tarnish-resistant' fabrics will need to be replaced.

Pacific Silvercloth® protects against dust and scratches and is safe to use with gold, brass, diamonds, and all other precious metals and gems. It has been keeping sterling silver items bright and shiny for over 120 years. We are pleased to use genuine Silvercloth® as the lining of our mini drawstring jewelry pouch. Handcrafted in the USA, this little pouch measures 3-1/4" wide x 3-3/4" high and comes in its own little 4" x 4" x 1" box. *DO NOT WASH.*

Jewelry is *NOT* included with pouch.  
Jewelry shown in photos below is for size demonstration only.
