# THE WESTERN NEW YORK *Cadillac - LaSalle Club*

## **Welcome to the Western New York Cadillac - LaSalle Club...**

We are a club composed of owners and admirers of Cadillac and LaSalle automobiles of all eras. We are one of many local groups chartered by and under the aegis of the National Cadillac and LaSalle Club Inc.

Our Western New York chapter has been chartered since 1986. We presently (August 2016) have **55 members**, in areas from Buffalo to Rochester, and into the Southern Tier to Corning New York. We publish a local newsletter, "The Talefin" 4 to 5 times per year. We also have a slate of club events including a car show in Amherst NY in July, and another show in Rochester NY in August. We host a post-Holiday dinner at one of our better local restaurants in early January, a Spring Brunch, and an ice cream social in the summertime.

## **Meetings**

Our meetings are held on the first Saturday of each month at 1:00pm in Sunny's Restaurant in the Batavia City Center Mall, except for May, June, July, August and January, when our club events serve as meetings. **Be certain to click on the "Calendar" tab above to check for any updates or changes in meetings or planned activities.**

We are always open to welcoming new members, in discussing those hard to handle repairs, those difficult to locate parts, and just plain old gabbing about the great old cars.

Meetings and lunch are held at **Sunny's Restaurant in Batavia**, no reservation is needed.

*Sunny's Restaurant & Lounge  
12 Batavia City Center  
Batavia, NY 14020*

[Click here for directions](#)

[Click here to like us on Facebook!](#)

If you would like further information on the club's activities, membership application, or in fact anything pertaining to Cadillacs and LaSalles please contact any of the following;

Jerry Puma (716) 839-3937  
Dan Marinola (716) 773-2091

## Welcome to The GreenFields!

After a serious injury, surgery or illness, you may recover slowly. You may need to regain your strength, endurance, relearn skills or find new ways of performing tasks you did before. So, to get back in action, you need **physical therapy rehabilitation** from the expert therapists.

## Physical Therapy in Lancaster, NY

GreenField Health & Rehabilitation Center has earned a reputation for being the premier physical therapy rehabilitation center in Western New York. This is largely due to the success of our patients, whom we are dedicated to providing with the highest standard of care.

Our state-of-the-art facility, located in Lancaster, NY, offers a broad range of specialized services, including some of the most skilled aquatic therapy in Buffalo, NY, and beyond.

We are committed to providing comprehensive rehabilitation programs to optimize patient health, functionality and quality of life. Orthopedic rehabilitation yields many benefits, some of which include:

- Less pain when performing normal, everyday activities
- Improved balance and coordination
- Increased endurance throughout the day

When you choose GreenField Health & Rehabilitation Center for your rehabilitation needs, you will receive a full spectrum of care that addresses more than just the physical aspects of your injury or illness. We tailor treatment to the unique needs and goals of each patient, addressing physical, medical, vocational, and emotional aspects of the rehabilitation and recovery process.

Our expert staff consists of doctors of physical therapy, physical therapists, occupational therapists, and speech and language therapists who provide post-surgery rehabilitation, outpatient physical therapy rehabilitation, massage therapy, pain management, pre-surgical rehabilitation, and speech and language therapy.

We are committed to helping you to **accomplish everything that you are capable of** – and perhaps more than you imagined you could ever be.

Physical Therapists and staff members monitor patient progress.

### Aquatic Therapy

Our unique Aquatic Therapy program is offered in our full-sized pool, maintained at 94-96 degrees and easily accessible via stairs with railings or chair lift.

## YES IS THE STORY ABOUT A REMARKABLE BOY AND HIS JOURNEY, AND HOW YOU CAN HELP.

John Miller is a 3-year old boy and race car fan. He's smiling & his family here today called YES -- (Yes! Yes! Yes! Yes!) because John's Journey 100 is a part of the team that controls vital functions. Your children will be able to survive a race in 100 hours from the time of diagnosis.

We have received word that John has been approved for surgery for the \$70,000 and \$70K at Hershey's Spirit Center and is scheduled for surgery on November 13. This is exciting news and it also means that it's time to start recording your time. We're asking you to donate \$20 and recruit 10 friends to do the same to help us reach our goal of \$40,000,000.

The cost of this proved to be a miracle procedure for us when we received a letter stating that in February, we're left with less than 2 months to raise the money we need to pay for this procedure.

**Racecar & Crew**  
It's time to race, so write away the green flag on the journey. We're asking you to recruit a crew of 10 friends to donate \$20 each. When you take the checkered flag to your own John's Journey 100, you help a special boy get the critical help he needs.

The rally car is on the track, so please help it win with you too.

START YOUR GENEROSITY

[DONATE NOW](#)

PLEASE DONATE \$20 AND RECRUIT A CREW OF 10 TEAMMATES TO DO THE SAME!

## Welcome to The McGuire Group

Since the opening of our first health care facility in 1973, it has been and continues to be our mission to be the **first and best choice** for our residents and patients.

We're proud to be a family-owned, award-winning health care provider that for generations has been pioneering and integrating progressive programs and services in Western New York and Long Island.

This commitment is reflected in the outstanding star rankings our facilities continuously receive from the state and federal governments, as well as repeated recognition as Top Performers in New York State's Benchmarking Pool Results. To learn more about our star ratings and how we compare to other facilities, click [HERE](#) or visit [www.medicare.gov](http://www.medicare.gov).

For more than 40 years, it has been our mission to empower residents and patients to make choices in their health care journey. We encourage you to call our facilities directly to inquire about services and bed availability.

The Motor Physiology Group at the University of Rochester is an association of faculty spanning several Departments (Neurobiology and Anatomy, Neurology, Brain and Cognitive Sciences and Biomedical Engineering) who share a scientific interest. Elucidation of the neural computations leading to coordinated action. The ability to smoothly coordinate movements requires processing of sensory information, selection of appropriate behaviors, integration of sensory feedback and motor commands, adaptation to novel stimuli and external conditions, as well as planning and execution of simultaneous motor subgoals. Failure to implement these computationally intensive elements affects one's ability to function at many

# PetPadre

## Welcome to PetPadre

### How Did We Get Started?

Pets are part of the great American family!

We love our pets. We buy them presents, toys, fancy foods and the best medical care, and yet when they suffer illness or die we are often left alone and struggling with our grief and worry, unsure of how the world will view our tears.

Even when we belong to a Church or other spiritual home, we are often left feeling that we cannot approach our pastor for fear that we will be belittled or pushed away. One lady said to us "With so much human tragedy in the world I knew that my pastor would have little sympathy for me when my cat died!" Well even if this is true, and sadly many people do see things this way, we at PetPadre believe that God Cares about our families and that those pets we love are a gift from Him that bring us companionship and joy.

It is wrong to be left alone in our grief and to believe that our family loss is any less because it involves a pet. Realizing that millions of people had nowhere to turn during their time of loss, and realizing that Pastors and Religious leaders were reluctant to pray for the welfare of animals, we at PetPadre decided to take a stand! Turn to us, we care!

**Welcome to the Diocese of Dar Es Salaam!**

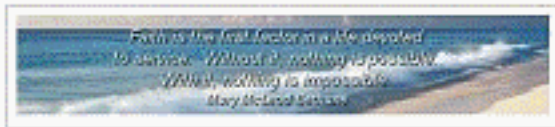

The Anglican Church of Tanzania is an autonomous province of the world wide Anglican Communion. It believes in the traditional teachings of the Christian faith as laid out in the historic creeds and holds to the tenets of the Chicago-Lambeth Quadrilateral of 1888, which is an instrument of Anglican unity throughout the world.

# Virtuosity

Virtuosity™ is an online electronic digest read by over **80,000** people in **37** countries. Often challenging, sometimes controversial, NEVER dull, Virtuosity exists to keep people informed about the worldwide Anglican Communion and to preach the gospel of our Lord Jesus Christ.

## Episcopal Partnership for Global Mission

**The Episcopal Partnership for Global Mission (EPGM)** enables Episcopalians to participate in God's global mission. Since 1835, all Episcopalians have been members of the Domestic and Foreign Missionary Society of the Episcopal Church. EPGM stimulates reflection and action on the basis of that common mission commitment.

EPGM was inaugurated in April 2000 with the participation of more than fifty mission-related organizations, including congregations, dioceses, voluntary agencies, networks and Executive Council. It builds on the Episcopal Council for Global Mission, formed in 1990, by drawing diverse mission efforts into a recognized relationship with General Convention and Executive Council, affirming a shared theology of mission, EPGM implements tested covenants, carries out defined functions, fosters relationships in the Anglican Communion, and operates as a collaborative and non-hierarchical network.

## "Simon Sez"

After working with professional golfers all across the world, I followed my calling into the priesthood and have since trained as a hospital chaplain. It was during my training at a Children's hospital that I met a family whose 13 year old daughter Kasia, had been struck down suddenly with a severe bleed in her brain. She was admitted to the ER and I was the Chaplain on call.

[Please click here to read this miraculous story!](#)

I decided to release the CD and to give all royalties to Kasia's Rehabilitation Fund. So when you order a copy of this CD, please know that you are not only helping yourself, but helping cheer for a cheerleader who is clinging hard to her teen spirit.

Several of the professionals that I worked with donated money to a children's hospital when they won a tournament, will you help out too? This release of the CD is offered as a fund raising ministry outreach of the Church, and we can issue you with a 501 C3 tax receipt in the USA if you would like one.

## The Association of Medical School Neuroscience Department Chairpersons

[Membership Application](#)

[Member Login](#)

### Mission of the AMSND

- Establish a cooperative organization for the leaders of basic science departments in Schools of Medicine whose major mission includes the conduct of research and education in neuroscience.
- Implement regular communications (i.e. national meetings, web/internet mechanisms), utilized by the Chairs of participating departments as well as guests of the Association, in order to discuss and disseminate local and national policies, practices and activities relevant to the membership.
- Advocate the recognition of neuroscience-based departments as distinct entities within medical school organizational structures and for the provision of support and resources for their missions.

### Goals of the AMSND

- Foster recognition of neuroscience as a distinct academic unit within medical school organizational structures, including their identity in the analysis of national activities and trends.
- Promote and coordinate data collection, analysis, and exchange of relevant information between the AMSND, medical schools, and national organizations (e.g. NIH, NSF, NASA, AAMC, AMA, NCBSOC, CAS, private foundations and industry), and directly represent the membership in such organizations where appropriate.
- Provide a platform for the membership to identify and share emerging trends, policies and best practices relevant to improving successful leadership across member departments.

The Graduate Program in Neuroscience at the University of Rochester is an interdisciplinary program with faculty from more than 10 Departments and Centers spanning both the Medical Center and the College. Students interested in graduate training in Neuroscience are admitted to the Neuroscience Cluster which integrates the admissions process and coordinates the First Year curriculum. After their first year, neuroscience graduate students select one of several Ph.D. programs according to their interests and program requirements (in consultation with the advisory committee). Each of these degree granting programs offers a specialized curriculum that emphasizes a particular approach to the study of the nervous system. Programs and their faculty maintain close interaction such that all students interested in a neuroscience career can find the best match for their individual training needs within the broad neuroscience community at the University of Rochester.

The first year curriculum provides students with a broad foundation in the principles of neuroscience, training in critical reading and discussion of primary literature, as well as research experience in labs of interest. Following this fundamental training and exposure to the breadth of ongoing research at the University of Rochester, students concentrate their further studies according to their individual interests and choose a graduate degree granting program from amongst the following: [Interdepartmental Graduate Program in Neuroscience](#), [Neurobiology and Behavior](#), [Brain and Cognitive Sciences](#), [Biomedical Engineering](#), or [Pharmacology/Physiology](#). Each of these programs has unique requirements and each offers a different approach to the modern study of the brain.

## education

### Educational Role of the Department of Neurobiology and Anatomy

An enduring departmental role continues to be its commitment to education. This commitment includes extensive participatory and leadership roles in medical, graduate, and undergraduate curricula at the University of Rochester. Faculty in the Department have received a continuous stream of awards for teaching and leadership efforts over the years, including a fifth of all Dean's Teaching Scholars Awards, and recurrent commendations and awards conveyed by students.

## HUMAN SUBJECTS CORE

A variety of research projects within the CNCS employ human subjects. However, all have operated independently, with rare interaction between them. However, there has been no centralized database of subjects available, and no personnel to coordinate our needs across studies. These shortcomings are now solved by the **Human Subjects Core (HSC)**, which provides the following key services:

**Coordinate recruitment and screening of human subjects across research projects.** This includes recruiting subjects, obtaining basic medical sensorimotor/neurologic, and cognitive screening exams relevant to the populations targeted by Core studies. Populations now under study include normal subjects across a broad range of ages, adults across ages with acquired hearing loss, elderly subjects with Alzheimer's disease, and subjects with unilateral and bilateral peripheral vestibular loss.

**Coordinate scheduling and tracking across projects** in order to maximize efficiency and convenience for subjects, investigators and staff. Further, the use of common subjects across studies supplies novel and paired observations that enhance productivity and stimulate new and collaborative research.

**Implement and maintain a powerful database that will provide protected access to data and analytic tools for investigators and staff.** This central service promotes new studies while making existing ones more efficient.

# Doc Wild's WORLD

"Treating Nature Deficit Disorder For Over 3 Decades!"

An artful form of "educational entertainment" for both children and adults

Doc Wild (formerly the Critterman) is just one of the alter-egos of Denny Olson, who for more than 30 years has been a student and teacher of the natural world. Well-known nationwide for his theatrical performances and speeches, Denny strongly believes in encouraging children and adults to think about how nature and people are connected. Denny has written books on cougars, deer, "place-based" education and Native American stories. His characters include Doc Wild, Professor Avian Guano, Dr. Death, The Lost Voyager, and Doctor Loonacy. As one unsuspecting victim of Denny's performances put it, "I didn't realize I learned so much until it was too late!"
