About Powerbite

A Powerbite Mouthguard is the perfect way to safely and comfortably protect your mouth during sports. Custom moulded and fitted to your teeth, the mouthguard protects against sports related injury while allowing for improved speech and breathing.

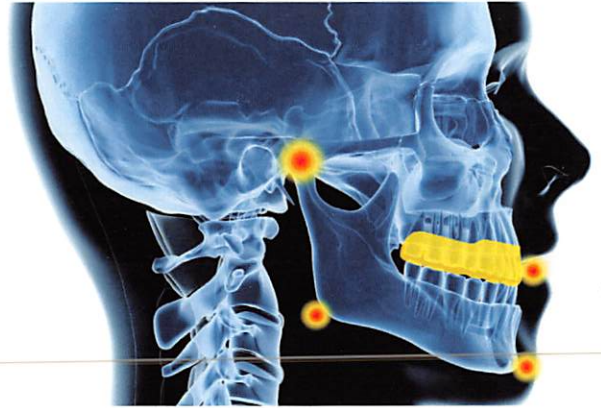

Why Sportsguards?

Sportsguards are a necessity for anyone participating in contact sports. It is estimated by the American Dental Association that athletic mouthguards prevent approximately 200,000 injuries each year!

How Mouthguards work?

The custom Mouthguard prescribed by your dentist, is manufactured from laminated vinyl and molded to your teeth for maximum retention. This gives the guard the flexibility for comfort with the greatest oxygen uptake and breathing. The multi-layered EVA vinyl helps to protect the mouth and jaws from impact and concussion.

Benefits and Advantages:

Protect those smiles against sports related dental injuries!

- *Precision molded for increased comfort and fit*
- *Reduced thickness for improved speech and communication*
- *Laminated vinyl to protect against injuries and concussion*
- *Custom-fit for breathing and maximum oxygen uptake*
