WHAT WE OFFER

Sustainability Reporting

Transform Efficiency

RealMTRX analyzes and implements sustainability programs for our clients. Our systems enable a property to become energy efficient and provide leak detections. This controls costs as well as positively impacts the environment by reducing carbon emissions.

Utility Bill Processing

Automate Your Process

RealMTRX processes, organizes and stores your bills on our secure, cloud-based architecture so that you can have 24/7 access to utility analytics. Streamlining your billing increases accuracy by tracking usage and generates on-time invoices. We target 100% recoupment of all utility speed.

Standardizing Vendor Formats

Simplify Integration

RealMTRX guarantees seamless integration with all existing accounting software. Advanced processing systems are accessible and user-friendly for all clients. We innovate to customize all services.

Tenant Submetering

Analyze Accurately

RealMTRX can validate, upgrade or install new smart meter systems that provide accurate daily data. We generate precise tenant invoices on time, every time.

UTILITY SOLUTIONS

SOLAR POWER

Determine the best system for your properties to save on bills

NATURAL GAS

Extract natural gas consumption and total cost

WATER

Calculate accurate water usage consumption data from all meters
