The Ultimate Configurable Cleaning System

Why ReFlo Technology?

We continually review, refine and adapt our manufacturing processes to deliver even greater levels of sustainability throughout our product ranges.

Following extensive research and testing, we have introduced ReFlo Technology to our janitorial carts

ReFlo Technology uses the highest quality recycled plastic, delivering the same reliability, durability and quality as always.

Providing a tough Structofoam construction, ReFlo Technology ensures our products are both sustainably engineered and built to last.

Why ReFlo Technology?

- **Environmentally Sustainable** - Engineered from the highest quality recycled plastic
- **Built to Last** - Numatic reliability, durability and quality
- **Exceptionally Tough** - Heavy-duty, chemical-resistant Structofoam construction

Numatic Nu-Design

Individual Environments Demand Individual Cleaning Solutions

Finding a janitorial system that fits your needs completely can be a real challenge. Giving total freedom of choice to the user, Nu-Design offers the ultimate solution.

Compatible with desktop and mobile devices

Poor selection and configuration lowers cleaning standards and productivity.

The Nu-Design configurator guides you through a product configuration process, providing a visual output and configuration breakdown at each selection. The result, a reliable, functional and innovative cleaning system that fits your needs precisely.

How it works

1. Select your trolley base and castor options
2. Pick storage options that meet your needs exactly
3. Choose your mopping system, waste options, accessories and personalisation
4. Submit for itemised breakdown and quote.
