

THE RICCAR COMMITMENT

Whatever your lifestyle or cleaning style, Riccar builds a vacuum perfectly tailored to your needs. But there's a common thread among everything made by Riccar. From our feisty little handheld vacuums to top-of-the-line Tandem Air machines, each machine features a powerful motor, superior filtration, and durable parts and materials. All this, plus the convenience of smart overall design for your chosen model.

We're especially proud to assemble our upright vacuum cleaners here in the United States.

Not only do we design and engineer most of our vacuums in America, but molding, painting, assembly and testing is all done at our manufacturing facility in St. James, Missouri.

SupraLite

CORDLESS

UNTETHERED

No cord means no limits. Get the power of a regular vacuum without the inconveniences of winding and unwinding a cord, tangles and trip hazards, or running out of cord just before the job is done. Just pick up your Cordless SupraLite and go. Anywhere.

LIGHTWEIGHT

The untethered SupraLite doesn't just save you the strain and aggravation of wrangling a cord, it also saves your back. Odds are it weighs less than the family cat, which means you can easily clean up those fur balls no matter where they hide. Plus, SupraLite lies flat and with its low profile nozzle, cleans around furniture and under beds easily.

QUIET

The SupraLite purrs so quietly, you can clean without disturbing sleeping babies or drowning out the TV. Your cleaning range – and the window of time you have to get it done – just got a whole lot bigger.

SupraLite

CORDLESS

With a motor that nestles low in the nozzle, the SupraLite is ideally suited to root out deep-seated dirt. With every rotation of the brushroll, particles shake loose, enter the powerful airstream and are carried away and trapped in the HEPA media bag.

POWER

- 44 Volt Lithium Ion Battery
- Over 60 Minutes of Vacuuming per Charge
- 480 Watt Motor
