

Integrating Esri Field Maps and Dashboards into Stormwater and Mosquito Control Data Collection

By: Janice Pulver

What we are now using

Why change Stormwater data entry?

- Stormwater Maintenance used Explorer to view their ditch layers, but entered it into Excel
- Created the new data entry system in the off season of 2022
 - Rolled it out in January of 2023

Stormwater Data Entry

Ditch Maintenance, Chokepoints, and Easements to Mow

Field Maps

Stormwater Data Entry

Dry Weather Screenings and Debris Collected

Field Maps

Survey123

- Dry Weather Screenings
 - Survey123 entries can be exported into a preformatted report
- Debris Collected
 - The survey helps auto complete ID names
 - Easier to enter and makes cleaner data

YORK COUNTY STORMWATER OUTFALL INSPECTION REPORT

Section 1: Basic and Environmental Data

Outfall ID: $\${NodeNumber}$	Latitude: $\${Latitude}$	Longitude: $\${Longitude}$
Today's date: $\${DateCurrent}$	Time (Military): $\${TimeCurrent}$	
Inspectors: $\${Employee}$		
Temperature: $\${Temperature}$ °F	Rainfall (in.) Last 24 hours: $\${RainfallLast24}$ Last 48 hours: $\${RainfallLast48}$ Days ago #: $\${RainfallDays}$	
Seasonal Climatic Conditions: $\${Climate}$	Standing Water Present: $\${WaterPresent}$	Mosquito Larvae Present: $\${Larva}$

Section 2: Outfall Description

LOCATION	MATERIAL	SHAPE	DIMENSIONS (IN.)	SUBMERGED
Type: $\${OutfallType}$	Closed Pipe $\${PipeMaterial}$	$\${PipeShape}$ # of Pipes: $\${PipeNumber}$	Diameter/Dimensions: $\${PipeDiameter}$	In Water: $\${SubmergedWater}$ With Sediment: $\${SubmergedSediment}$
	Open drainage $\${DitchMaterial}$	$\${DitchShape}$	Depth: $\${DitchDepth}$ Top Width: $\${DitchTopWidth}$ Bottom Width: $\${DitchBottomWidth}$	
Pipe/Ditch Condition	Satisfactory?: $\${OutfallCondition}$ If No, Note repair needed: $\${OutfallConditionNo}$			
Flow	Present?: $\${Flow}$ Description if Present: $\${FlowDescription}$			

Section 3: Characterization

Mosquito Control Data Entry

- Updated it this off season
- Wanted to incorporate past trapping, testing, and adultciding data up to 2018
 - Format and compile everything
 - Figure out how to manually create a relationship class to existing tabular data

The screenshot displays a GIS application interface. On the left, the 'Contents' panel shows a 'Layers' list with 'Adult_ID_All_Trapping_0' selected. The main window shows a data table for 'Adult_ID_All_Trapping_0' with the following columns: FOG_AREA, supr_distr, DatelDStart, Employee, TrapType, TrapCategory, EmptyAtPU, Ae, Ae_abs_F, Ae_abs_M, Ae_aeg_F, and Ae. The table contains 28 rows of data, including columns for FOG_AREA, supr_distr, DatelDStart, Employee, TrapType, TrapCategory, EmptyAtPU, Ae, Ae_abs_F, Ae_abs_M, Ae_aeg_F, and Ae.

	FOG_AREA	supr_distr	DatelDStart	Employee	TrapType	TrapCategory	EmptyAtPU	Ae	Ae_abs_F	Ae_abs_M	Ae_aeg_F	Ae

Mosquito Control Data Entry

Fish Deliveries and WNV Testing

Field Maps

- Fish deliveries
 - Add a new point to the map and fill out the associated questions/fields
- Testing
 - The concept is to write it down on paper, as we usually do, then enter it after testing is completed

Mosquito Control Data Entry

Trapping

Field Maps

Survey123

- Can pan or search for a trap site or address
- New trap sites and/or non monitoring sites can be added
- Click a site and open Google Maps to navigate to it
- May help interns learn the sites faster visually seeing where sites are instead of on a piece of paper

Mosquito Control Data Entry

Yard Inspections and Larvaciding

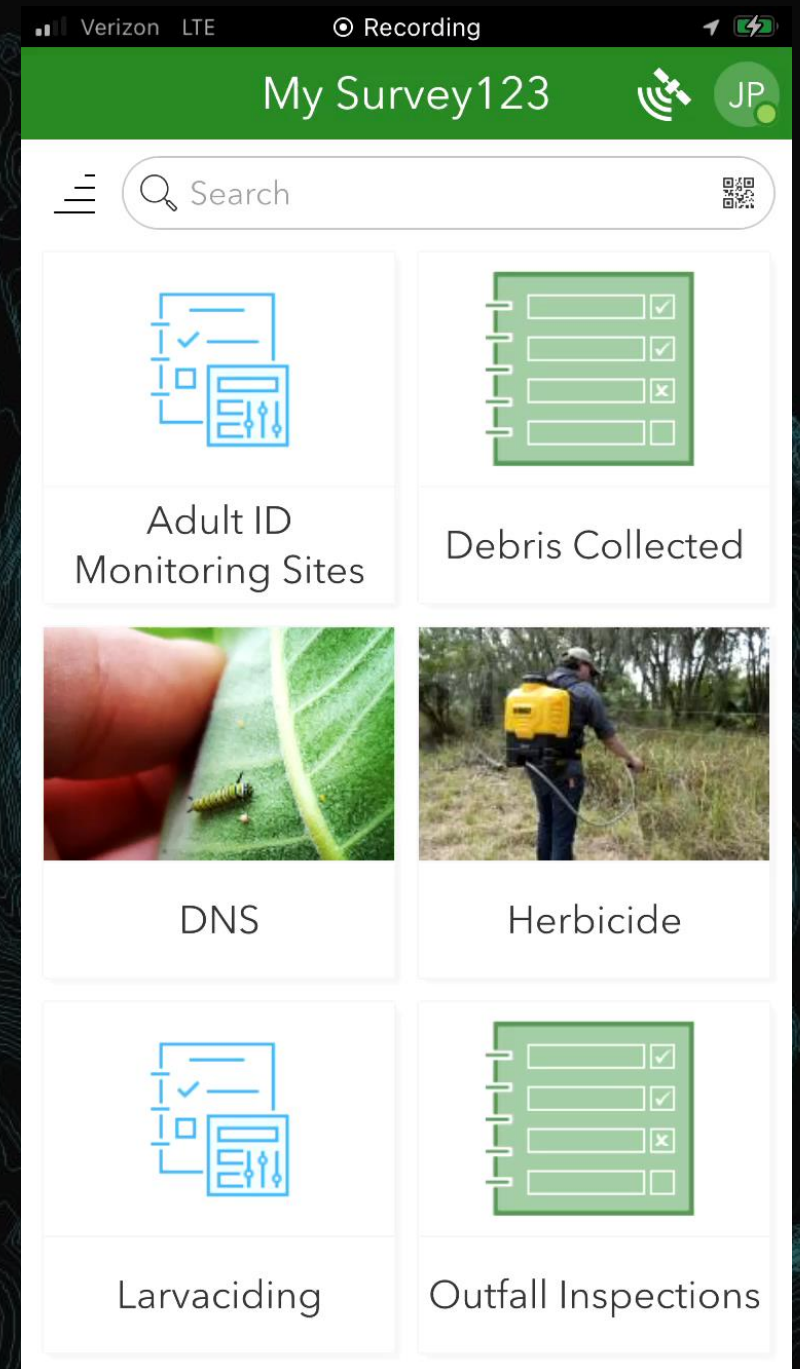

Field Maps

Survey123

- Larvaciding
 - Combined 4 surveys into 1
- Entries show up on map after submitting

Mosquito Control Data Entry

Powered by Esri

Area(s) Adulcided

Fog Area: 09B
Treated: 9/13/2023, 8:00 PM
Product: Merus

Fog Area: 09A

Learning Curve

- ArcPro, Field Maps, arcade (like a coding language), and Dashboards are all new programs to me
 - Biggest help:
 - Esri's Eric Wagner step by step tutorial on how to setup Field Maps
 - Esri community forums
 - Naming
 - Single digit numbers should be preceded with a "0" for the search function to work well
 - Same length for everything in a field

Fog Area

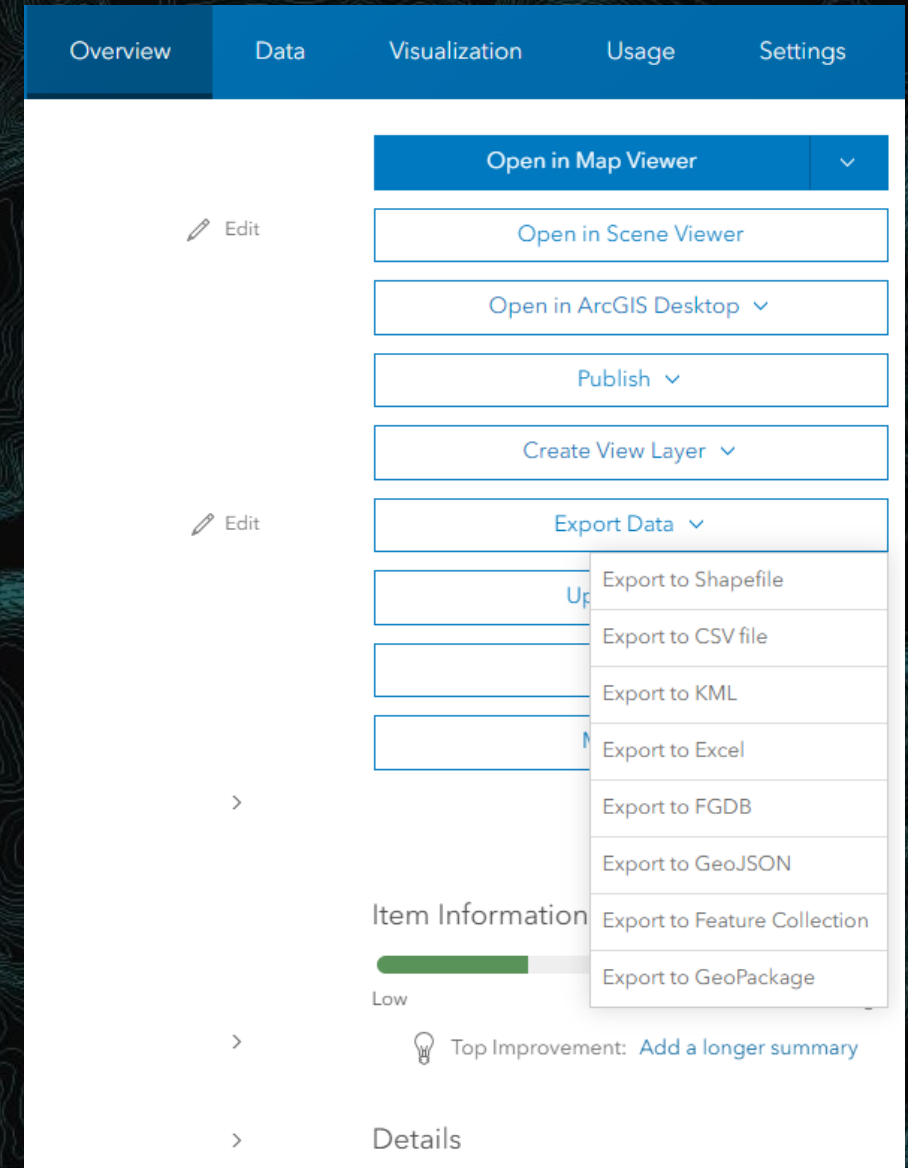

Run

```
1 if (IsEmpty(Geometry($feature))){
2   return;
3 }
4 else{
5   var parcels_FS = Intersects($feature, FeatureSetByName($map, "Fog Areas"));
6   if (Count(parcels_FS) == 1){
7     return Text(First(parcels_FS).FogArea);
8   }
9 }
```

The image shows a YouTube video player interface. The video title is "Inspection Workflows Part 1: Building and Publishing Related Tables" by Eric Wagner, a Solution Engineer at Esri. The video content features a map with blue lines and yellow markers, overlaid with handwritten-style text: "Inspection Workflows Part 1", "Building and Publishing Related Tables", and "Eric Wagner, Solution Engineer, Esri, Global Water Practice". A small inset video shows a man speaking. The video player includes a search bar, a play button, and a progress bar showing 0:06 / 8:19. Below the video, there are engagement icons for likes (142), shares, downloads, clips, and saves, along with a subscribe button for Esri Industries (22.2K subscribers).

Drawbacks

- Everything is stored on AGOL
 - Data storage or credit issue?
 - May be used to it on a different format, but you can export attribute tables to Excel
- Access to ArcPro and have a standard license
 - Can't create a relationship class with a basic license, but can have someone with one to
- Learning how to do this
 - Ask your GIS people do it instead?

Benefits

- Totally customizable, within your own ability, and updated on your time
 - Can be designed for any level of worker
- Makes looking up data at your desk or phone very easy and quick
 - Can answer questions out in the field
- Apps are constantly being updated from what users want to see in them, so functionality will get better over time
 - Downside is keeping up with the latest and greatest features

The screenshot displays the ArcGIS Content Manager interface. The browser address bar shows the URL: `yorkcountyva.maps.arcgis.com/home/content.html?view=table&sortOrder=desc&sortFi...`. The page title is "Content" and the user is logged in as "My Content".

The interface includes a search bar with the text "Search Mosquito". Below the search bar, there are two main sections: "Folders" and "Filters".

The "Folders" section shows a list of folders under the "Mosquito" folder:

- All my content
- Stormwater
- Survey-Adult ID Monitoring Sites
- Survey-Backpack Larvaciding
- Survey-Debris Collected
- Survey-DNS
- Survey-Herbicide

The "Filters" section shows two filter categories:

- Categories
- Item type
 - Maps

The main content area displays a table of items, showing 1 - 10 of 10 items in the "Mosquito" folder. The table has columns for "Title", "Type", "Owner", "Status", and "Modified".
