

PCR 2016 CONFERENCE

Charleen Singh | 7190 Sierra Drive | Granite Bay, CA 95746

Pacific Coast Region of the Wound, Ostomy and Continence Nurses Society

2016 CONFERENCE

RESORT AT SQUAW CREEK™
SQUAW VALLEY

Olympic Valley, CA | April 7-10, 2016

Program Objectives

At the conclusion of this program, the participants will be able to:

Better understand the unique role and value a nurse plays through the eyes of a patient.

Discuss ideas for creating better outcomes, inspiring yourself and those you work to serve.

Discuss the key concepts of preventative risk management and legal practices for the healthcare provider.

Define avoidable and unavoidable pressure ulcers.

Identify indications for avoidable/unavoidable pressure ulcers according to National Pressure Ulcer Advisory Panel Guidelines (NPUAP).

Define fistula and discuss management and discharge planning of patients with fistulas.

Recognize factors, modifiable and non-modifiable, affecting Quality of Life of people living with an ostomy.

Inspire at least one change in your clinical practice based on the evidence presented.

Recognize that a neuropathic ulcer is an emergency.

Explain the relationship between stress and strain and differentiate flotation and contouring.

Explain regulations and legal ramifications regarding pressure ulcers.

Explain non-healing wound pathophysiology and some of the factors that affect healing.

Describe wound care therapies and standard of care and what the evidence is telling us.

Describe at least two ways we can improve and provide cost-effective and clinically efficacious solutions.

Describe the latest technologies to manage pressure ulcers.

Identify two new methods of risk screening of pressure ulcers.

Describe new technologies for pressure ulcer detection.

Explain three key areas for pressure ulcer prevention implementation.

Identify key characteristics and risk factors for diagnosing red, scaly conditions.

Discuss the pharmacodynamics of medications used for eczematous conditions.

Define and compare common three eczematous & papulosquamous skin diseases throughout the lifespan.

Discuss differential diagnosis of IAD and define the relationship between IAD and pressure ulcer risk.

Outline options for prevention and treatment.

Describe biologic dressing options for wound care.

Describe hydrotherapy for wound care.

Review risk factors for ostomy complications.

Describe options for management of difficult ostomies.

Explain best practice for ostomy care.

Describe the support surface options.

Demonstrate use of compression therapy.

Demonstrate appropriate use of fistula management system.

Demonstrate pouch application for irregular stomas.
