

Enjoy natural and healthy soft water today

Our mission is to increase your quality of life without sacrificing our environment.

Every year, salt-based softeners waste countless millions of gallons of water and add untold tons of salt to our environment. At Cascadian, we created a better way.

Find out why people are moving away from salt-based softeners and turning to our safe and healthy **PolyHalt®** solution.

 Marks Common Water Problem Areas.

What is PolyHalt®?

Cascadian's **PolyHalt®** is a certified safe blend of natural phosphates. It is a better and eco-friendly way to soften water using exclusive ion bond™ technology

Versatile

PolyHalt® is more than a water softener, one system treats multiple water quality problems.

Eco-Friendly

No salt or wastewater added to our environment.

Budget Friendly

Lower cost to buy, install and maintain.

No Slippery Feeling

Does not make you feel slippery or slimy when rinsing soap.

Smaller Size

Hangs on wall saving floor space.

Simpler

Quick and easy to install. And it takes a mere 5-10 minutes per year to maintain.

No Electricity Required

No power problems, no computer programming or adjustments required.

No Drain Required

No salty wastewater added to septic or sewer systems.

Silent Operation

No moving parts, nothing to break down, no control noise and no noisy water flowing to drain.

Legal Everywhere

Use anywhere salt-based softeners are banned.
