

THE COMMITTED TO CLEAN AIRB&B WORLD PROGRAM

Welcome! We're committed to following Airbnb's 5-step enhanced cleaning process. Here's what we've done to clean and sanitize:

Approved products: We use cleaners and disinfectants approved by global health agencies.

Thoroughly checked: We refer to Airbnb cleaning checklists while cleaning.

Clean and tidy: We cleaned, mopped and/or dusted before sanitizing. We are running an Ultra-violet C aeration system and UV light-killing machine 24-hours a day. It is called the Code Blue Air system and was tested at Harvard Medical School to kill and sterilize.

Cleaning supplies on hand: We provide extra cleaning supplies, so you can clean as you stay. We have provided Lysol in each room for 20+ years. It's not something new for us and we have never been cheap and not offered it.

Every surface sanitized: All high-touch surfaces have been sanitized, down to the doorknob.

This space was cleaned by Kim Hambright and Martin Mongiello.

Date:

This cleaning summary is provided by your host. It's not a statement made by or on behalf of Airbnb. To learn more about the protocol, visit airbnb.com/cleaning for more information.
