

SureNail® Technology

There's a line between a good shingle and a great shingle.®

It's the nailing line on your shingles. The difference between a good shingle and a great shingle is having Patented SureNail® Technology. With SureNail® strip, strength and durability are built into every Duration® Series shingle. This unique shingle design provides outstanding gripping power.

roofing contractors

believe SureNail® Technology gives:

- the most visible nail line;
- greater nail pull-through and nail blow-through resistance; and
- better wind up-lift protection

than standard shingles.

Excellent Adhesive Power

Helps keep the shingle layers laminated.

Outstanding Grip

The SureNail® strip enhances the already amazing grip of our proprietary Tru-Bond®** sealant for exceptional wind resistance of a 130-MPH wind warranty.*

Breakthrough Design

Patented SureNail® Technology is the first and only reinforced nailing zone on the face of the shingle.

"No Guess" Wide Nailing Zone

This tough engineered woven-fabric strip is embedded in the shingle to create an easy-to-see strong, durable fastener zone.

Triple Layer Protection®+

A unique "triple layer" of reinforcement occurs when the fabric overlays the two shingle layers, called the common bond area.

Double the Common Bond

SureNail® features up to a 200% wider common bond area in the nailing zone over standard shingles.

* See warranty for details, requirements and limitations.

** Tru-Bond is a proprietary premium weathering-grade asphalt sealant that is blended by Owens Corning Roofing® and Asphalt, LLC.

+ The amount of Triple Layer Protection® may vary on a shingle-by-shingle basis.

SureNail® Technology is not a guarantee of performance in all weather conditions.

SureNail® Technology is available only on Owens Corning® Duration® Series Shingles.
