

SEED GERMINATION Investigation Sheet

Seed Germination Investigation

My question is:

I will measure...

Things I will keep the same...

My prediction is...

What is required for the investigation?

Explaining Your Results

When you changed your variable what happened?

Why do you think this happened?

Did the results match your prediction?

Were there any problems with this investigation and how did you solve them?

How could you improve this investigation?

Seed Germination Investigation

My question is:

I will change...

I will measure...

Things I will keep the same...

My prediction is...

What is required for the investigation?

How is the investigation to be completed? (steps taken)
