

As of July 1, 2019 all newly purchased or newly purposed vaccine storage units must be single stand-alone units.

The guide below will assist in determining the proper size needed for the estimated doses being stored in the unit at any single time.

	Volume at any one time	Maximum Doses	Minimum Cubic Feet	Type of Unit Needed
Refrigerator	Very High	10,000+	Multiple units needed	Full size stand-alone unit 
	High	2,000-10,000	May need multiple units	
	Medium High	1,000-2,000	40 cu. ft.	
	Medium	901-1,000	36 cu. ft.	
		801-900	21-23 cu. ft.	
		701-800	17-19.5 cu. ft.	
	Low	400-700	16.7 cu. ft.	Under counter units 
Freezer	Medium-High	501-6,000	7-14.8 cu. ft.	Full-size units 
	Low	201-500	5-5.6 cu. ft.	
				Under counter units 
		0-200	3.5-4.9 cu. ft.
