

The snowshoe trails on the map above are north of the nature center. Loop 1 (green) and Loop 2 (purple) are beginner trails. Loop 3 (red) is advanced. The three trails are flagged with orange and blue tape.

Loop 1 begins at the nature center and travels through the riverine forest. At the garden you have the option of taking the foot bridge and following Loop 3 to Lookout Point. Loop 1 is about 0.8 miles

You can approach Loop 2 from the trailhead just east of the river. This loop follows the river closely. Loop 2 is about 0.6 miles long.

Loop 3 travels uphill and along the ridge through Duckstad Wood. It is advanced due to the steep terrain. Loop 3 is about 0.8 miles long.

The trail above marked in purple is a new snowshoe trail which begins at the parking area at the top of Summit Ave (just east of Strem Field). From the trailhead at the kiosk there, follow the flags, which are (mostly) pink. This segment is about 0.8 miles, so 1.8 miles roundtrip. The views from Scout Tower are incredible! This trail is appropriate for beginners.

The four snowshoe trails have a total length of 3 miles!
