

Betty Galore Corsetry Measurement Form

In order for your corset to fit properly, it's imperative that your measurements are as accurate as humanly possible. Don't take your measurements over bulky or loose clothing, use a flexible/soft tape measure, get a friend to help you (you will absolutely not be able to do this alone), and record your **measurements in inches**. Your corset will be made to these measurements so if they are not accurate, your corset will not have optimal fit. Use the illustration below as a guide to complete the measurements in order. Do not exclude any of the measurements (yes, I know it's a lot, but they're all necessary).

Name:

Date:

Email:

Phone:
