

Guidelines for Modifying Landscaping within Mulched Areas

(Three attachments: Perennials, Shrubs, Trees)

The Red Cedar Canyon Townhouse Association may allow homeowners to modify landscaping in the mulched areas surrounding homes in the association.

Requests for modifications must go through the management company.

To request a modification, homeowners must complete the **Application for Architectural, Landscape or Irrigation Modification Request form** available from Property Manager.

The following guidelines have been adopted by the Red Cedar Canyon Townhouse Association Board of Directors based on recommendations of the board-authorized Landscape Committee.

- When completing the form, include a sketch of all landscaping layout plans for board approval and recordkeeping.
- Landscape modifications are limited to the mulched areas surrounding homes and include ground plantings of flowers, perennials, shrubs, and trees. Landscape modifications are not allowed in the lawns or around trees in lawns.
- Borders must be maintained around mulched areas.
- The board will respond to your requests in a timely manner.
- When association-provided plants or trees are replaced, homeowners will be asked to select replacement plants or trees from the attached lists of approved perennials, shrubs, and trees developed by the association Landscape Committee. The lists are also available at citiesmanagement.com. These plants and trees were selected as attractive and hardy for the Red Cedar Canyon landscape.
- Homeowners who initiate landscape modifications out of personal choice (not because an association tree or shrub has died, for example) are responsible for all landscape modification expenses, as are future owners of that home.
 - Homeowner expenses and responsibilities include plant purchase, planting and upkeep, as well as any future removal.
 - Homeowners are asked to consider choosing plants from the lists of approved perennials, shrubs and trees developed by the association Landscape Committee.

- Once the modifications are approved by the board and at least 10 days before digging, Cities Management will coordinate with Wisconsin Diggers Hotline and Nature's Touch Irrigation to flag utility and irrigation lines. These contacts are required to ensure that no damage is done to property by digging. Any property damage must be corrected at the homeowner's expense.
- Refuse must be disposed of according to the rules listed on the City of Hudson website. In 2017, garden/landscape refuse must be disposed of in recyclable paper bags available at Menard's, and each bag must be accompanied by a trash pick-up tag available at the County Market service desk.
- Containers offer an attractive way to display annual and some perennial plants. Note that plants displayed in containers/pots that are placed in the mulched areas do not require landscape modification request and approval.
- Mulch is renewed by the association at each home every three years. However, homeowners may add mulch to their mulched areas at any time at their own expense, using only association-approved **Premium Cedar Mulch**, available at Menard's.

Perennial (Flower & Plant) List for RCCTH Homeowners

Common Name	Genus	Species	Average Height	Average Time of Bloom	Light Requirements	Attracts Hummingbirds	Attracts Butterflies	Attracts Pollinators
Asiatic Lily	Lilium	asiaticum	12-36"	June-July	Full sun to partial shade			
Aster	Aster		2-6'	August-Oct	Full sun to partial shade		X	X
Astilbe	Astilbe		12-36"	Spring	Partial shade to full shade			
Balloonflower	Platycodon		30-42"	June-August	Full sun to partial shade			
Beard-Tongue	Penstemon		12-36"	May-July	Full sun to partial shade	X	X	
Bee Balm	Monarda		2-5'	June-Sept	Full sun to shade	X	X	X
Bellflower, Harebell	Campanula		1-5'	June-Sept	Full sun to partial shade	X		
Big Bluestem Grass	Andropogon	gerardii	5-8'		Full sun			
Black/brown-eyed Susan	Rudbeckia		1-5'	June-Sept	Full sun to partial shade		X	
Blanket Flower	Gaillardia		12"	Summer	Full sun to partial shade		X	
Blazing Star	Liatris		1-6'	August-Sept	Full sun	X	X	X
Bleeding Heart	Dicentra		12-36"	May-June	Partial shade to full shade			
Butterfly Weed	Asclepias	tuberosa	24-36"	June-August	Full sun	X	X	X
Common Milkweed	Asclepias	syriaca	2-4'	June-August	Full sun to partial shade		X	
Coneflower	Echinacea		2-4'	July-Sept	Full sun to partial shade	X	X	X
Coral Bells	Heuchera		6-30"		Partial sun to shade			
Coreopsis/Tickweed	Coreopsis		12-36"	June-August	Full sun		X	X

Cranesbill	Geranium		12-24"	Summer	Full sun to partial shade		X	
Creeping Phlox	Phlox	subulata	4-6"	Spring	Full sun to partial shade		X	
Daylily	Hemerocallis		12-36"	Summer	Full sun to partial shade			
False or Wild Indigo	Baptisia		3-5'	June-July	Full sun to partial shade		X	
False Sunflower	Heliopsis	helianthoides	2-6'	June-Sept	Full sun		X	
Feather Reed Grass	Calamagrostis	acutiflora	3-5'	July-August	Partial shade to full sun			
Ferns	Fern		Varies		Varies			
Garden Phlox	Phlox	paniculata	36-48"	Summer	Full sun to partial shade		X	
Helenium	Helenium		18-24"	June-Sept	Full sun		X	
Hen & Chicks	Sempervivum		4-6"		Full sun			
Hosta	Hosta		12-18"		Partial shade to full shade			
Indiangrass	Sorghastrum	nutans	5-7'		Full sun			
Iris	Iris		18-40"	Spring	Full sun to partial shade			
Little Bluestem Grass	Schizachyrium	scoparium	12-48"		Full sun			X
Maiden Grass, Flame Grass, Porcupine Grass, Silver Japanese Grass	Miscanthus	sinensis	4-6'	Late summer to late fall	Partial shade to full sun			
Mum	Chrysanthemum		12-24"	August-Oct	Full sun			
Oriental Lily	Lilium	orientalis	12-48"	July-August	Full sun to partial shade			
Ornamental Onion	Allium		12-48"	Varies	Full sun to partial shade			
Peony	Paeonia		18-40"	Spring	Full sun to partial shade			
Russian Sage	Perovskia	atriplicifolia	24-48"	July-Sept	Full sun		X	
Salvia/Sage	Salvia	nemorosa	18-50"	June-Sept	Full sun to partial shade		X	

Shasta Daisy	Leucanthemum	superbum	15-30"	July-Sept	Full sun to partial shade		X	
Spiderwort	Tradescantia		12-40"	June-July	Full sun to partial shade		X	X
Stonecrop or Sedum	Sedum		4-30"	Varies	Full sun to partial shade		X	
Switchgrass	Panicum	virgatum	36-50"		Full sun to partial shade			
Yarrow	Achillea		18-24"	July-Sept	Full sun to partial shade		X	

Plants hardy to Zone 4

Shrub List for RCCTH Homeowners

Estimated, Varies by
Variety

Common Name	Genus	Species	Recommended Varieties	Height	Width	Light Requirements
Shorter Shrubs for Under Windows						
Arborvitae/White Cedar	Thuja	occidentalis	dwarf/compact/pygmy	2'	6'	Full sun
Birds Nest Spruce	Picea	abies	Nidiformis	2-4'	3-5'	Partial shade to full sun
Hydrangea	Hydrangea	arborescens or macrophylla	shorter varieties	2-4'	3-5'	Full sun to partial shade
Juniper, Red Cedar	Juniper	chinensis	dwarf/compact/low growing varieties	2-4'	6'	Full sun
Dwarf Globe Blue Spruce	Picea	pungens	dwarf/compact/pygmy	2'	5'	Partial shade to full sun
Potentilla, Cinquefoil	Potentilla	fruticosa	Goldfinger, Dakota Sunspot, Mango Tango, McKay's White, Pink Beauty	2-3'	3-4'	Partial shade to full sun
Spirea	Spiraea		try to match nearby spirea	2'	2-3'	Full sun to partial shade
Medium-Large Shrubs						
Alpine Currant	Ribes	alpinum		3-5'	2-6'	Partial shade to full sun
Arrowwood Viburnum	Viburnum	dentatum		5-8'	5-7'	Full sun to partial shade
Burning Bush	Euonymus	alatus	Compact	5-6'	5-6'	Full sun to partial shade
Cotoneaster	Cotoneaster	spp		3'	5-6'	Full sun to partial shade
Dogwood	Cornus	spp	compact, red twigged	6'	9'	Full sun to partial shade
Dwarf Korean Lilac	Syringa	meyeri	Palibin -- shrub form	3-4'	5-7'	Full sun
Dwarf Korean Lilac	Syringa	meyeri	Palibin -- tree form	8'	5-6'	Full sun
Forsythia	Forsythia		Gold Tide, Fiesta	2-10'	4-12'	Full sun
Golden Shadow Pagoda Dogwood	Cornus	alternifolia	Wstackman	12'	15'	
Lilac, Dwarf	Syringa			4'	4-5'	Full sun
Mockorange	Philadelphus		Snowbelle	4'	4'	Partial shade to full sun

Ninebark	Physocarpus	opulifolius	Amber Jubilee, Tiny Wine, Tiny Wine Gold, Candy series, Little Devil	2-6'	3-4'	Full sun to partial shade
Redwing Viburnum	Viburnum	trilobum	JN Select	10'	7'	Partial shade to full sun
Snowberry, Coralberry	Symphoricarpos	albus, hybrid x		3-5'	4-6'	Full sun to partial shade
Spreading Yew	Taxus	x media		3-4'	5-7'	Full sun to partial shade
Weigela	Weigela	florida	Minuet, Tango, Spilled Wine	2-5'	3'	Full sun to partial shade
Wentworth Viburnum	Viburnum	trilobum	Wentworth	12'	12'	Full sun to partial shade
