

CORNERMATIC PLUS®

The CORNERMATIC PLUS® was specifically designed to address the difficulty with inserting corners into some styles of fitting ductwork. It joins other worldwide successful Cornermatics such as the Dual-Head and the Corner Cadet® in reducing shop labor. After three years in development, we bring to the industry a machine that can handle any TDC®/TDF® fitting assembled on a bench. The CORNERMATIC PLUS® automatically and effortlessly inserts and crimps TDC®/TDF® corners in seconds. The Cornermatic Plus provides the ability to produce section of duct (eight corners) in about 20 seconds in any gauge, 16-26. Generally, tests have shown 80 ducts/hour versus 15 ducts/hour for manual insertion.

- Specifically designed for the fabrication of duct fittings - even the toughest inside or outside angle off-set transition fitting from 16-26 gauge
- Fully automated-no switches or foot pedals, just push the duct work or fitting into the flange guides and the Cornermatic Plus does the rest
- Completes (8) corner inserts in seconds, corners are inserted square and fully crimped.
- New quick loading StrapPak™ packaging technology speeds loading and eliminates the need to sort and orient the corners before installation
- Corners feed from below the work-surface allowing a clean, unobstructed work area
- Handles tight square throat elbows and flex connectors
- Works with SMACNA-conforming, T-25a and T-25b flange and many other flanged duct systems, without changing settings
- Ask about optional table or 'in-floor' mounted unit
- Bring your fitting productivity up to duct section standards
- No need to change the crimping adjustment when inserting corners in 16 to 26 gauge ducts
- Adjustable legs to match most bench heights
- Will handle any fitting built to SMACNA standards
- Can handle odd size fittings such as flex connectors and curbs
