Agile Scrum Master Certification with overview of SAFe and Jira Course Information

Course Title	Agile Scrum Master Certification with overview of SAFe and Jira
Course Description	Agile methodologies are quickly becoming the methodology of choice in several industries. Scrum is the most widely used Agile methodology. This course is to provide deep understanding of Agile Scrum methodology. It will prepare students to become a Scrum Master and to go through Scrum.org's Professional Scrum Master certifications. Also, included will be an overview of other methodologies including a detailed understanding of SAFe (Scaled Agile Framework). A practical understanding of how to implement Agile Scrum using Jira and other tools will also be presented. This course is suitable for both people who are not familiar with Agile and for people who are familiar with Agile and want to get PSM certification.
