

“Merlot” Redbud

Cercis x Merlot pp#22297

A perfect spring flowering tree for smaller landscapes. A phenomenal new hybrid with dark purple foliage similar to Forest Pansy, but with Texas Redbud in its genes!! Excellent drought tolerance and thick, glossy leaves that stand up to summer heat. Bright lavender-pink flowers in spring. Tight, dense, semi-upright habit. 12'. Sun or partial sun. Leaves don't burn in our hot summers.
