

# Autumn Fern 'Brilliance'

## *Dryopteris erythrosora*

Autumn Fern is a colorful addition to the shade garden with pink “fiddleheads” that turn coppery orange as they unfurl. Fronds age to a lustrous dark green & remain well into winter. New growth continues through the season, giving a colorful tapestry effect of copper & green from Spring to late Fall. Evergreen in mild winters, root hardy otherwise. Shade to filtered shade, moist soil. **Deer resistant.**
