

# Macho Fern

*Nephrolepis falcata*

The fronds of Macho Fern can reach 4' long – easily – so give it room to grow in a pot or a massive hanging basket – it definitely makes a statement! Can grow 4' tall x 4' wide and has a wonderful cascading growth habit. Considered tropical, protect from hard freezes. Plant or display in a shady area, or one with partial sun. Regular watering is needed for this large beauty.
