

No fillers | No injections | No surgery

WAVES 21™ – THE MOST SIGNIFICANT BREAKTHROUGH IN HEALTH AND BEAUTY TREATMENTS THIS CENTURY

WAVES 21

WAVES 21

WAVE GOODBYE TO STUBBORN FAT...

Waves 21 is a unique device that enables treatment of aesthetic beauty problems, many of which were previously untreatable.

HOW IT WORKS

Waves 21, the only non-invasive unique device that enables us to treat aesthetic problems such as subcutaneous fat (subcutaneous fat is the soft, loose fat visible just under the skin) and fat around the organs (visceral fat), which until now has been virtually impossible to deal with existing technologies.

Waves 21 stimulates muscle bands (Metameres) with frequencies that not only treat the fat around the organs and various parts of the body but also restores the bodies natural ability to repair itself.

ADVANCED TECHNOLOGY.
THE FIRST TO COMBINE
CRYOTHERAPY
WITH METAMERIC
STIMULATION

WHAT ARE METAMERES?

Metameres are 11 muscle bands located across your back. As we age they lose efficiency.

Each Metamere connects the sympathetic nervous system to an organ connected directly to the Metamere.

Our Metameres transmit this vital information from the brain, essential to heal our organs and relieve our health problems.

METAMERIC STIMULATION

Two handles with adjustable power are used that stimulate the Metamere by emitting sinusoidal wave forms in particular frequencies that correspond to the frequencies of brain waves in specific phases.

CRYO & LIGHT THERAPY TREATMENT

A large surface treatment handle that delivers advanced cryolipolysis combined with the benefits of violet light therapy.

VIOLET

It is the ray of the visible spectrum with the greatest energetic properties. It facilitates the balance between sodium and potassium at cellular level relaxes and decompresses nerves and muscles stimulates lymphatic system and venous return.

TREATMENT APPLICATION AND BENEFITS

Focussed Visceral and Subcutaneous fat reduction

Hormonal and belly fat reduction

Cellulite Improvement

Skin tightening and firming

Lifting, toning and firming

Detoxification and improving drainage

Enhanced blood circulation and oxygenation

Deep Muscle relaxation

Stimulates the spleen, lymphatic system and production of white blood cells

Non invasive treatments that improve your body and your health

...WITHOUT INJECTIONS OR SURGERY

The results are visible and measurable from the first application and long lasting.
