I then removed the old trans and took off the old engine from the table and put the new engine back on and reinstalled the old trans onto the new engine I re-assembled the vehicle back together. with the eng back in the vehicle and coming with oil already in it I bled the coolant system and charged the ac system, I used the tester to delete all faults and start the vehicle no new faults or warnings came on I let the vehicle get up to temp and inspected around the vehicle for any leaks and found none. I test drove the vehicle and found no issues
