

Strengthening 5G Cybersecurity for Our Nation

Independent, Third-Party Validation

Stephenson Stellar Corporation (SSC) is a nonprofit, vendor-agnostic organization that can provide independent, objective testing of vendor 5G claims.

Vulnerability Detection

Our expertise enables us to identify 5G vulnerabilities at the device, system, and ecosystem levels.

Space Security

SSC's core competency and expertise in space technology enables a holistic understanding of space-based 5G/ FutureG system security, encompassing every aspect of space deployments.

Mitigation Measures

We can provide clear technical guidance based on exploitation testing results to develop Tactics, Techniques and Procedures that improve 5G integration and security.
