

Assuring our Nation Remains a Global Leader in the Space Domain

Independent, Third-Party Validation

Stephenson Stellar Corporation (SSC) is a nonprofit vendor-agnostic organization that can enable satellite cyber experimentation against ground-based FlatSats representing a constellation of spacecraft.

Space-Cyber Experimentation

SSC's expertise in cyber and space technologies allows operators to conduct cyber research across a full spectrum of systems and conditions in a secure and contained laboratory environment.

Highest Levels of Training

SSC Subject Matter Experts provide realistic red team and blue team training in space system cyber vulnerabilities and mitigation techniques.

The Future of Space Security

We can provide Tactics, Techniques, and Procedures (TTPs) to improve space asset resiliency and provide next-generation cyber tradecraft solutions for space systems.
