

# Scrum Master Roles and Responsibilities: SAFe 5.0 Aligned

1. Assist Product Owner	2. Implement Vision	3. Be a Servant-Leader	4. Coach Team
Help define Product Vision	Maximize biz outcomes via Scrum	Ensure team's highest priorities are being met	Host meetings for team (e.g. Daily Stand-Ups, Sprint review)
Help refine Product Backlog Items (PBIs) on Product Backlog	Smoothly onboard new team members & hires	Ask team questions & act on answers => more effective	Ensure sense of task ownership / accountability among team
Implement feedback as actionable improvements for team	Help org embrace Scrum throughout value chain	Be a servant-leader to the team, not a traditional PM	Improve use of Scrum & tech skills @ team & individual level

5. Shield Team	6. Clear Roadblocks	7. Be the Process Authority	8. SAFe-Specific
Maintain delivering value as team focus	Identify, communicate & remove roadblocks	Ensures team adheres to Scrum values, principles & practices	Enable Continuous Flow using SAFe
Intercept external interference to sprint	Look for ones team can't remove themselves	Enact team-specific / fit-to-purpose approaches	Orchestrate inter-team ART collab & calibration
	Implement roadblock solutions		Promote, implement & support SAFe
