## WHO WE ARE

Innovative Technology Enterprise Strategic Solutions, LLC (iTESS) is a Service-Disabled Veteran-Owned Small Business located in the Washington, DC Metropolitan Region providing innovative technology and management solutions to local, state and federal government agencies. We are committed to providing the right tools and resources required to enhance outdated technology, improve processes, transform experiences and better navigate disruptions to stay ahead in a culture of continuous change.

*Our motto "Solutions for Success" exemplifies our commitment to ensuring our clients succeed.*

### Committed To Excellence

iTESS delivers unparalleled excellence to clients and employees through our strong culture of integrity, engagement, respect, and a passion for our clients' missions.

Our time-tested strategy produces sound and sustainable solutions for every facet of your business operations, right down to the smallest detail. Our valued strength is quickly mobilizing the right people, solutions, and technologies to help organizations achieve their objectives and program mission. We bring proven technical expertise, industry certifications, management know-how and a unique ability to partner with our clients.

We have a balanced business model which gives each business unit the flexibility to stay agile and maintain clear and concise understanding of customer requirements. What sets iTESS apart from the competition?

- Our People
- Performance-Based Processes
- Integrated Product Teams
- Strategic Mix of Technology and Business

## WHAT WE DO

### Technology and Business Transformation

Our Technology and Business Transformation services help organizations modernize applications, infrastructures, access to data, and business workflow automation to enhance productivity using Agile SDLC methodologies, to help customers deliver integrated solutions designed to enhance the performance of their business. We take pride in helping clients navigate today's digital transformation journey.

### On-Demand Product Development

We help bring your on-demand startup business ideas to life. Our versatile technology blueprint enables you to get started with your business website and/or mobile apps with custom front-end UI, advanced admin dashboards, and powerful analytics panel.

### Cyber Operations

Our Cyber Operations deliver innovative and continuous security services using 'Predict, Prevent, Protect' methodology, to manage risk and improve overall security for both classified and unclassified systems, data, and networks.

### Healthcare IT & Human Services Mission Support

Our Healthcare IT and Human Services offers a diverse set of SME technical capabilities across multiple disciplines to provide state, federal and local governments high-quality healthcare IT and human services solutions that are cost effective and tailored to each communities' unique needs.

## WHAT WE HAVE DONE

**National Guard Bureau, Air Directorate, Installations & Mission Support (NGB/A4)** - Program management, application development, and sustainment services for the NGB/A4, Military Construction (MCP/Milcon) and Sustainment, Restoration and Modernization (SRM/O&M), Project Datastore System (PDS).

**MicroHealth, Inc.** - Completed an internal cybersecurity assessment to determine gaps with CMMC readiness stemming from the Defense Federal Acquisition Regulation Supplement (DFARS) 252.204-7021.

**Dept of Navy (DON), Program Executive Office Enterprise Information System (PEO EIS)** - Project management support to develop an Internal Program Management Review (iPMR) tool that measured program performance with situational awareness of associated issues/risks and probability of program success.
