

Authorized Distributor

Delivering strength and thermal protection,
with uncompromised style.

Designing windows that deliver both structural strength and thermal protection is our job.

Doing it with style is our pleasure.

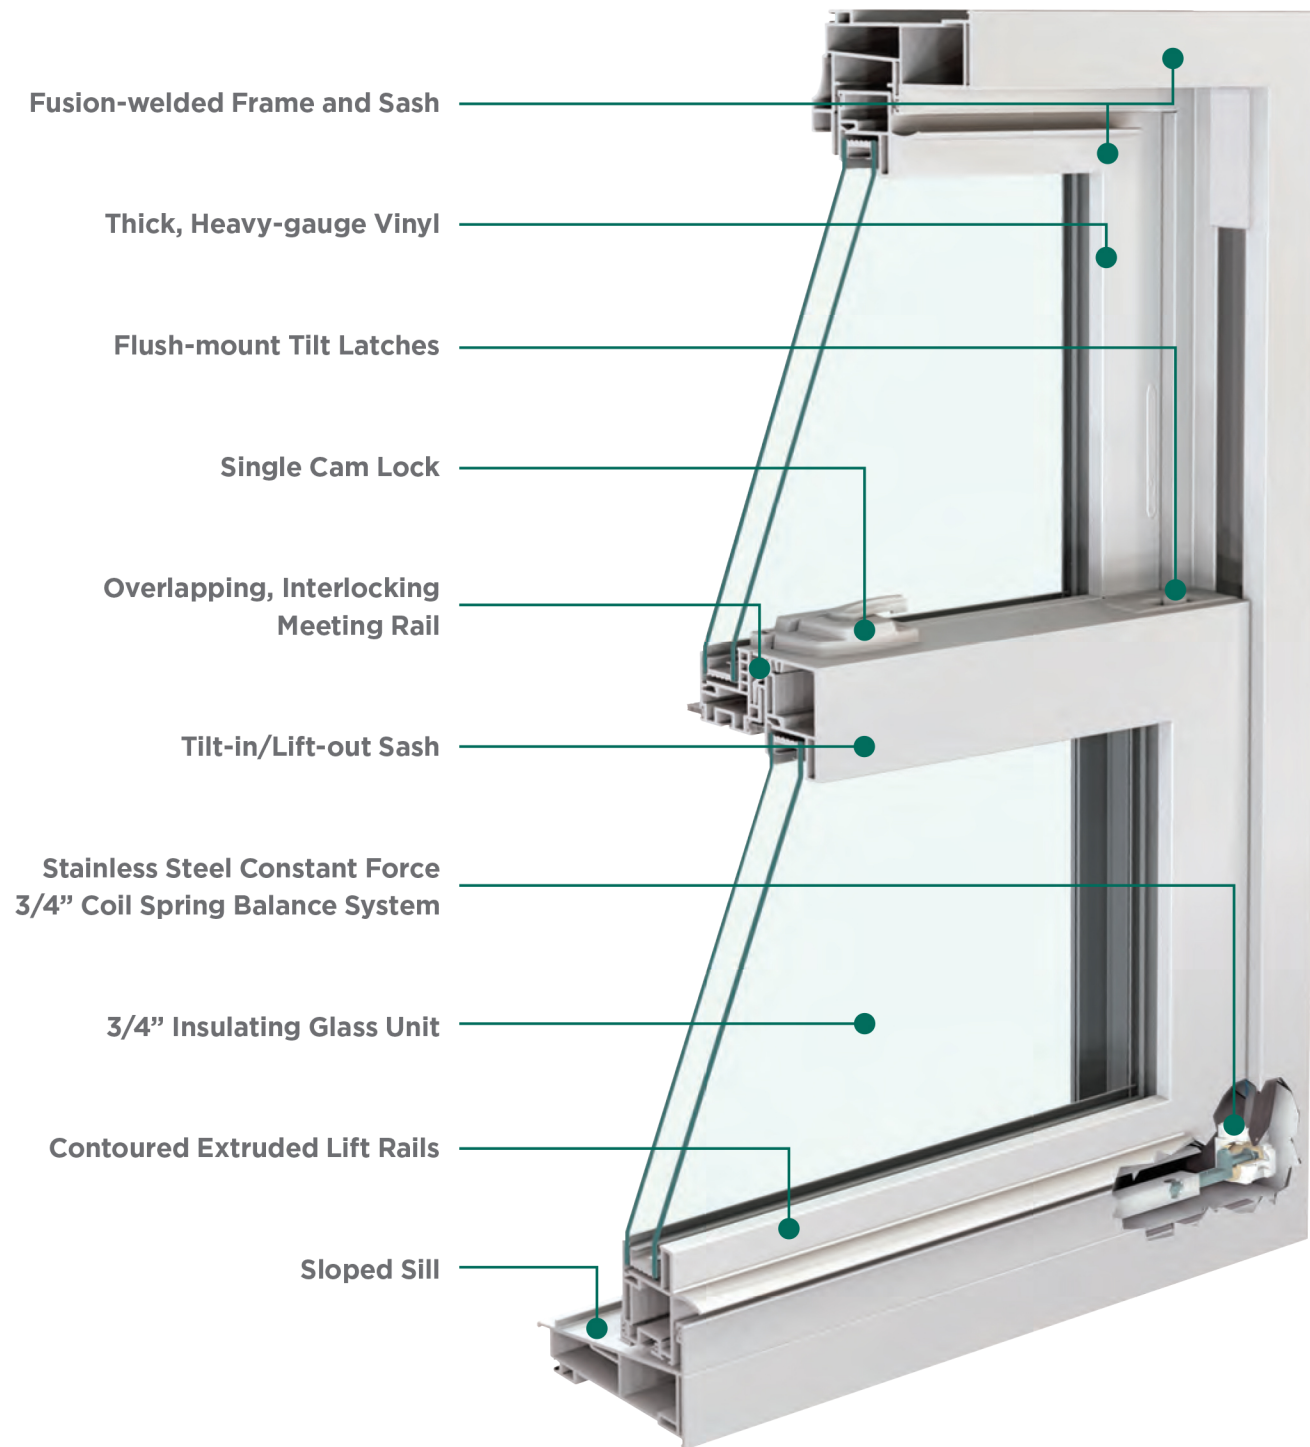

Over 40 years ago, our founder began his career in his family's window and door business. Ever since, he's been an active participant in the industry's progress from plain wood windows and doors to the exceptionally energy efficient replacement windows and doors we install today.

EcoView brings products that are of premium quality to the market, service that is dependable and pricing that is affordable. That's why so **many homeowners across America choose EcoView Windows and Doors.**

Our windows and doors are specifically designed for the region and climate where they will be installed. That means better performance for you, whether it is **keeping your family snug and warm during a frigid winter, or reflecting the blazing sun of a hot climate.**

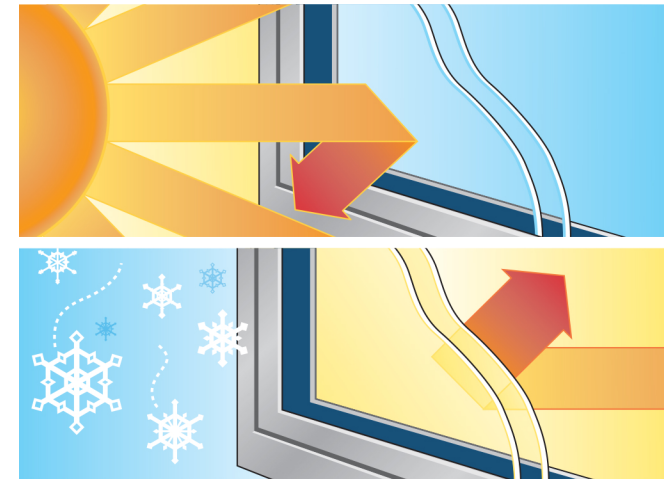

FEATURES

Designing windows that deliver both structural strength and thermal protection is our job. Doing it with style is our pleasure. Integrating classic designs, structural integrity, and thermal barriers into our windows is truly a labor of love. Because every time you gaze out your window upon a snowy backyard or witness a driving rainstorm from the comfort of your home, you'll know you made the right choice.

PERFORMANCE

Delivering strength and thermal protection, with uncompromised style. Boasting classic designs and thoughtful features, EcoView 7000 windows accent your home as well as your personality. Their sturdy, durable construction increases structural strength while improving weather resistance. And, with our advanced thermal efficiencies built right into the window, you can save a bundle on your heating and cooling costs. Which should make you more comfortable all year long.

THERMAL ENHANCEMENTS

You'll appreciate how the built-in thermal components work together in EcoView 7000 products to help lower energy costs and provide year-round comfort for your home.

- Fin seal weatherstripping creates multiple barriers against air infiltration
- Overlapping, interlocking meeting rail overlaps and interlocks the top and bottom sash to create a tight and secure seal
- Solarflect Glass works in conjunction with an Argon gas fill to reduce heat loss in the winter and maintain air-conditioned air during the summer
- The optional Warm Edge spacer system delivers thermal performance and structural integrity to help maximize the performance of your window

EcoView 7000 windows and doors are covered by a thorough double-lifetime limited warranty that covers vinyl, hardware, screens and insulating glass units. And, since the warranties can be transferred to the next homeowner, it is another great selling feature to potential home buyers.

ENERGY SAVINGS

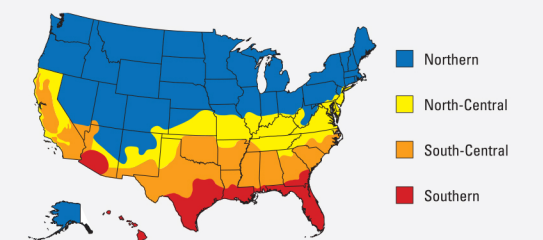

EcoView windows and doors can be ordered to meet ENERGY STAR® guidelines for any region in the country.

Simply choose the ENERGY STAR® glass package for your climate zone: Northern, North-Central, South-Central or Southern.

These glass packages are designed to provide the optimum in energy savings and comfort by utilizing insulating glass units with advanced Low E technology, Argon gas and durable spacer systems that drastically reduce the transfer of heat and cold.

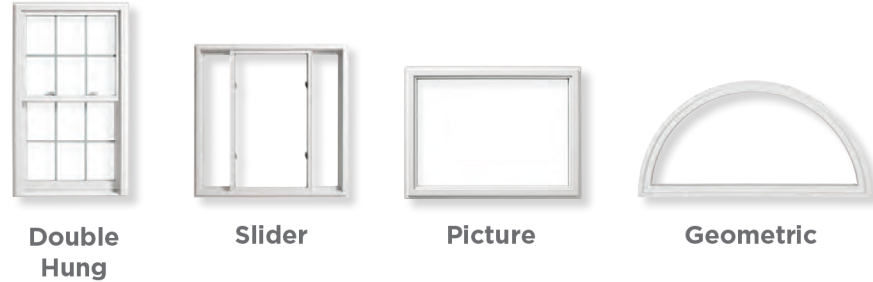

Low E also helps block damaging ultraviolet rays, which can fade carpets, draperies and artwork.

OPTIONS

EcoView 7000 windows come in multiple designs, giving you the flexibility to express your unique taste and style. Available styles include Double Hung, 2-lite Slider, 3-lite Slider, Picture, Half-round, Extended Half-round and Extended Eyebrow. Also available in patio doors and garden doors.
