2021 Hive Treatment

We are offering Spring and Fall Varroa mite treatments. We fog your hive with oxalic acid.

We come out to your hives on a nice day, after set-up it takes about 1 minutes per hive for treatment and 3 minutes longer before we can reopen your hive.

We charge a flat traveling fee per trip fee, depending of your location

For the 1st treatment there is a \$5 per hive charge. For the 2nd and 3rd treatment there is a \$2.50 per hive charge

All treatments must be between 7 to 10 days apart to get the ½ off price per hive.

Remember that treating your hive is not a guarantee to be varroa free.

WE accept Cash, Money Orders, cash and Credit cards. (There will be a 2.5 % fee added to all C.C. charges).
