

# A New Approach to Surviving the Energy Crisis

<b>PROBLEM</b>	<p>Energy prices spiralling at unprecedented and unpredictable levels.</p>
<b>IMPACT</b>	<p>Puts a squeeze on margins, making your business less profitable. Makes planning more difficult.</p>
<b>SOLUTION</b>	<p>A zero capex (off-balance sheet) solution, using a highly efficient technology to generate your own heat and power.</p>
<b>BENEFITS</b>	<p><b>Lower your electricity costs</b> and reduce reliance on grid energy by generating your own electricity and heat on site.</p> <p><b>Eliminate price uncertainty</b> through predictable electricity costs and accurate forecasting of operating expenses.</p> <p><b>Export</b> any excess to grid or <b>Private Wire</b> to a near neighbour.</p>

*Meaning we can fix your energy prices below grid prices with no capital expenditure on your part*

*Reduced energy prices coupled with price stability giving you the confidence to plan ahead with an annual fixed price, tracking below grid prices*

*We're up and running, it's your move next! Scan the QR code for more details.....*
