

Shining Eyes India

(Registration Under Section 60 And Rule 69)

Head office: Subhaspally, Post Office Santiniketan,
Pin Code 731235, District Birbhum, West Bengal
Phone: 9832232813

ANNUAL REPORT

1st April 2014 to 31st March 2015

1. Background:

Shining Eyes India was established in February 2013 to improve the health of tribal children especially in the rural area around Bolpur at Birbhum District, West Bengal.

Through the preventive medical work in the tribal villages the trust tries to eliminate the causes of severe infections and to reduce child and mother mortality. Hygiene, malnutrition and health awareness are most important fields to work on in order to strengthen child health.

Since 1994 the pediatrician Dr. Monika Golembiewski has been coming to the Santal villages Ghosaldanga and Bishnubati for medical help. She started a preventive medical care for children and mothers with improvement of hygiene and nutrition. In 2011 a charitable children hospital has been established with the collaboration of Berhampore Teresian Carmelite Society and the medical support for preventive work spread out to more and more tribal villages in the area.

Nowadays the Trust is active in 40 villages around Bolpur:

2. Activities:

The following activities have been taken place in from April 2014 to March 2015.

a) Nutrition programmes for malnourished children and pregnant women:

Like in the year before, the Trust has implemented nutrition programmes for malnourished children and pregnant as well as lactating mothers in several Santal villages. The mothers of the children are guided to prepare a nutritious meal from locally available ingredients for their children three times a week (Halwa and Khechuri with egg or chicken). The food is purchased locally and the Trust bears the costs for the food, a small salary for the cooking mothers and the fuel like gas and wood. The children are checked for their weight and growth development and receive medical checkups to cure infections and recognize severe sick patients. Therewith the trust aims to stabilize the health situation of children and women trough better nutrition in these villages. We include Moringa powder to the cooked food which is rich in iron, calcium, magnesium and other micronutrients.

In cooperation with the NGO Bolpur Manab Jamin the Trust has started 14 new nutrition programmes in February 2015. This is a PhD work of Caroline Stiller and Silvia Golembiewski in cooperation with University Hohenheim, Stuttgart, Germany.

No.	Village	No. of children	Cooperation partner
1	Ghosaldanga	29	--
2	Panchabanpur	21	--

20	Amradanga	28	Bolpur Manab Jamin
21	Borodanga	14	Bolpur Manab Jamin
	Total children	447	

b) Kitchen garden programme

The trust continues also to support the kitchen garden programme like in the year before. The villagers are asked to prepare the land available to them and to build up a fence to protect the greens from animals like goats. Then we provide seeds for starting a kitchen garden with vegetables. One farmer, Nilu Murmu, guides the villagers for planting and watering their gardens. Especially the male family members are engaged to take care for the gardening. Some do the plantation nearby the house, others in the paddy field. The harvested vegetables are used to enrich the daily food in the family and is shared also with neighbouring families.

No.	Village	No. of gardens July 2014	No. of gardens November 2014
1	Baganpara	14	9
2	Bautijol	21	23
3	Ghosaldanga	20	43
4	Bonepukurdanga	5	9

12	Tatpandi	--	15
13	Tanpuni	12	21
	Total gardens	258	348

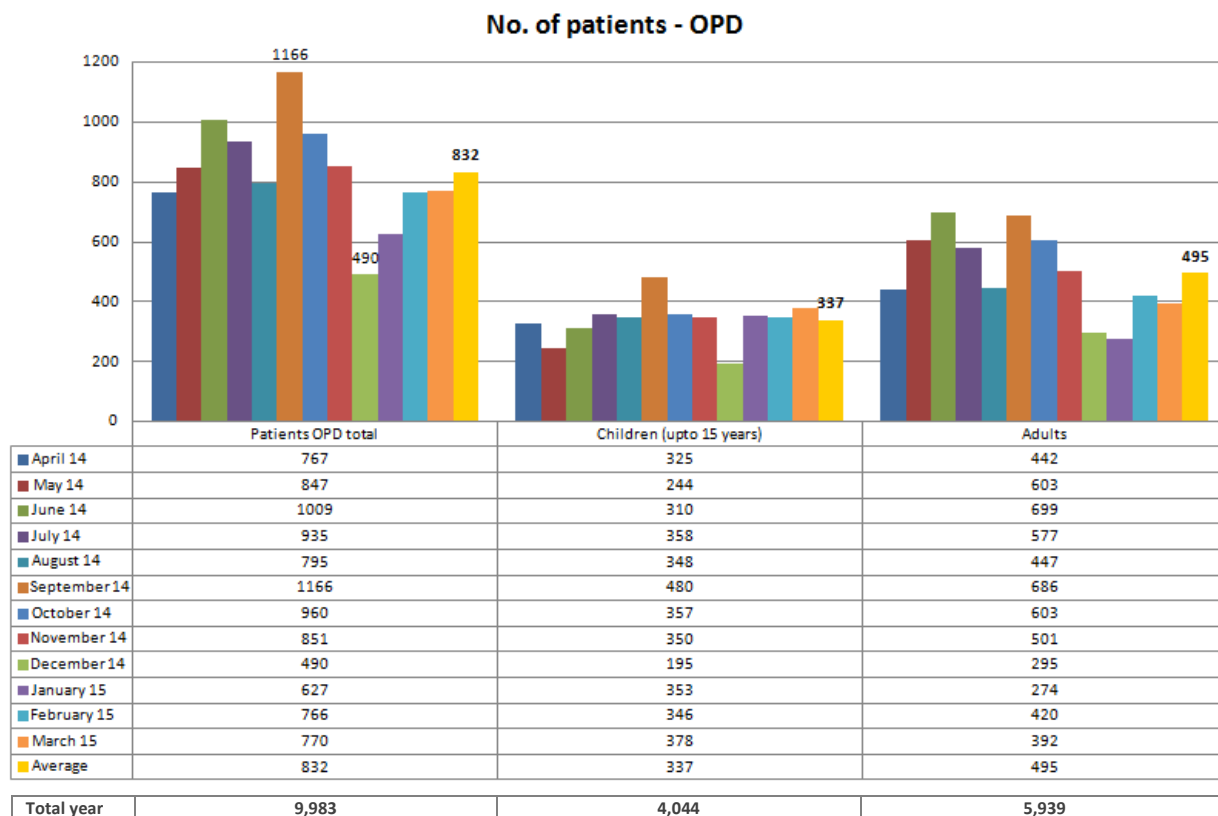

c) Collaboration with St. Mary's Child and Mother Health Care Centre

The trust continues and intensifies the collaboration with "St. Mary's Child and Mother Health Care Centre" at Makarampur, Bolpur.

This preventive health care centre is run by the Teresian Carmelite Society. There are local doctors giving their service in the OPD in the morning. Malnourished children and children with infections are being treated there. Moreover, TB patients get needed diagnostic and treatment in relation with the DOTS programme. The sister in charge is Sr. Lissy C.T.C. and we support her regarding administrative concerns through mutual discussion, advice and presence in the weekly staff meetings as required.

Total operations				11	

d) Medical checkups in the villages

Dr. Monika Golembiewski is a specialist for children and related to “St. Mary’s Child and Mother Health Care Centre”. She gives her voluntary service in the morning for admitted patients and during OPD in collaboration with the local doctors. In the afternoon she does village checkups in several Santal villages. The target of the village checkups is, to find the malnourished children (through measuring MUAC, weight and length). Furthermore pregnant women are seen for antenatal care and provision of vitamins as needed. Always the medical team searches for TB suspected persons during the checkups. Especially children of TB families are searched to give them needed preventive medicines in collaboration with the DOTS centres, avoiding TB infection later on.

Severe sick patients are referred to St. Mary’s Health Care Centre for diagnostic and treatment. Once a month our Trustee Prof. Dr. Swapan Mukhopadhyay continues to give his free medical service in this health care centre especially for the neurological children.

Date of checkup	Village	No. of patients seen	No. of patients referred to hospital
02/04/2014	Purvashundapur	30	1 child (<i>pneumonia</i>) 3 adults (<i>2 TB suspected, 1 with leprosy</i>)
03/04/2014	Rayerpukur	36	3 children (<i>2 ICP, 1 convulsion</i>) 7 pregnant (<i>6 anemia, 1 goiter</i>)
07/04/2014	Monedanga	17	3 children (<i>1 anemia, 1 skin, 1 TB prevention</i>) 1 pregnant (<i>anemia</i>) 1 adult (<i>TB suspected</i>)
10/04/2014	Bonepukurdanga	16	1 child (<i>pneumonia</i>) 2 adult (<i>TB suspected</i>)
13/04/2014	Patharkata	18	3 children (<i>2 malnutrition, 1 anemia</i>) 1 pregnant (<i>anemia</i>) 2 adult (<i>1 TB suspected, 1 lymph node</i>)

19/04/2014	Mirzapur	29	5 children (2 malnutrition, 1 abscess, 1 anemia, 1 otitis)
22/04/2014	Ringdanga	30	5 children (2 eye operation, 1 lymph node, 1 skin infection, 1 otitis) 2 adults (1 TB suspected, 1 pyelonephritis) 1 pregnant (risk)

01/07/2014	Ghosaldanga	22	2 mothers (1 goiter, 1 gyn. infection)
04/07/2014	Rayerpukur	23	7 children (1 TB prevention, 3 anemia, 1 abscess, 1 jaundice, 1 severe skin infection)
06/07/2014	Patharkata	20	5 children (1 staphylococci, 1 lymph node, 1 malnutrition, 1 severe infection, 1 hydrocele operation)
08/07/2014	Bautizol	19	2 children (1 otitis, 1 anemia)
11/07/2014	RSV Santal school	15	7 patients (1 thyroid, 1 abscess, 1 anemia, 1 TB suspected, 3 weakness)
11/07/2014	Bonerpukurdanga	17	2 adults (1 burning case, 1 skin tumor)
08/09/2014	Ringdanga	29	5 children (1 abscess, 1 lymph node, 2 eye operation, 1 anemia) 1 pregnant (polyneuropathia)
09/09/2014	Bishnubati	36	5 children (1 hernia operation, 1 anemia, 1 heart, 1 asthma, 1 severe infection) 5 adults (2 TB suspected, 1 anemia, 1 gyn. weakness, 1 facialis paresis)
12/09/2014	RSV Santal school	12	4 patients (1 neurological, 1 heart, 1 malnutrition, 1 TB suspected)
15/09/2014	Katabagan	29	7 children (3 anemia, 1 lymph node, 3 TB in family)
11/11/2014	Patharkata	19	5 children (2 delayed development, TB prevention, malnutrition, pneumonia) 1 pregnant (night blindness)
12/11/2014	Ghosaldanga	24	3 adult (1 abscess, 1 lymph node, 1 eye injury) 1 pregnant with ATB
15/11/2014	Rayerpukur	11	1 child (otitis) 1 pregnant
17/11/2014	Panchabanpur	10	2 children (TB prevention)
20/11/2014	Ringdanga	22	5 children (1 newborn infection, 2 severe infection, 1 anemia, 1 eye disease)
24/11/2014	Bishnubati	22	3 children (1 lymph node, 1 diarrhea, 1 skin necrosis) 2 adult (skin tumor, facialis paresis)
22/01/2015	Amradanga	58	3 children (1 bone tumor, 1 lymph node, 1 anemia) 1 pregnant (anemia) 1 lactating (anemia)
23/01/2015	Borodanga	34	1 child (anemia)
23/01/2015	Ramlakhandanga	33	2 children (1 malnourished, 1 not

			<i>growing</i> 1 mother (<i>anemia</i>)
24/01/2015	Ruppur Konrapara	31	4 children (2 TB family, 1 pneumonia, 1 needs heart operation) 2 mothers (1 lymph node, 1 weakness)
27/01/2015	Nurpur 2	18	3 children (2 malnourished, 1 anemia) 1 mother (TB family)
27/01/2015	Hatrasulganj 2	44	1 mother (<i>anemia</i>)
28/01/2015	Ballavpurdanga	56	5 children (4 with anemia, a low MUAC) 2 mothers (TB family, anemia)
29/01/2015	Nurpur 1	26	8 children (4 TB family, 3 anemia, 1 with hemangioma) 4 (3 anemia, 1 TB family)
29/01/2015	Hatrasulganj 1	41	1 child (TB family) 1 mother (<i>anemia</i>)
30/01/2015	Borobagan Mitradanga	52	1 child (TB family) 4 mothers (3 anemia, 2 weakness)
02/02/2015	Binodpur	28	1 mother (<i>anemia</i>)
03/02/2015	Borobagan	26	4 children (1 physio, 1 needs heart operation, 2 malnourished) 2 mothers (1 anemia, 1 hypothyreosis) 1 pregnant (<i>anemia</i>)
03/02/2015	Katabagan	26	3 children (<i>anemia</i> , fever, TB family) 1 mother (<i>anemia</i>)
04/02/2015	Abhirampur	13	
04/02/2015	Hetedanga	13	1 mother (<i>anemia</i>)
05/02/2015	Muluk Kalitala	23	1 child (<i>anemia</i> and malnourished)
06/02/2015	Kankutia 2	35	2 children (1 diarrhea, 1 TB family) 1 mother (<i>anemia</i>)
07/02/2015	Charakdanga	20	3 children (2 anemia, 2 TB family) 1 mother (TB family)
09/02/2015	Paruldanga	36	1 malnourished child 1 mother (<i>anemia</i>)
10/02/2015	Itedanga	25	2 children (1 TB family, 1 anemia) 1 mother (weakness/fever) 2 lactating (<i>anemia</i>)
11/02/2015	Bonerpukurdanga	25	2 children (2 TB family) 2 mothers (1 TB family, 1 anemia) 1 pregnant (<i>anemia</i>) 1 lactating (<i>anemia</i>)
30/03/2015	Ghosaldanga	13	1 child (<i>eye injury</i>)
31/03/2015	Bishnubati	19	2 children (<i>foot injury</i> , <i>eye injury</i>) 1 adult (BP)
Total No. of patients in 2014/15			205

e) TB diagnostic

The trust continues its TB programme in collaboration with St. Mary's hospital. During village visits we find frequently TB suspected patients who suffer from cough for a long time or have lymph nodes. Children are found especially with extra-pulmonary TB, like bone TB. We refer them to the Health Centre for diagnostic which is provided free of cost (x-ray and Mantoux, blood test is available, FNAC/biopsy is organized from an outside lab). St. Mary's social workers are trained to monitor the TB patients as to guarantee quick commence of the treatment after diagnostic and continuous medicine intake. Also awareness is given to the newly registered TB patients, who are included in the DOTS programme and receive additional supplement food. In February 2015 was held a meeting with the District TB Officer and his coordinator for registration as a sputum collecting centre and providing trainings for our staff in the DOTS program.

DOTS programme

Case No.	Age	Gender	Cat.	Type	Start	End	Result
1	45	m	1	pulmonary	03/03/14	09/12/14	completed
2	60	m	1	pulmonary	10/04/14	20/10/14	completed
3	30	m	1	pulmonary	22/04/14	21/10/14	completed
4	17	m	1	pulmonary	08/05/14	27/12/14	completed
5	18	m	1	pulmonary	23/05/14	24/12/14	completed
6	60	m	1	pulmonary	13/06/14	30/11/14	completed

8	30	m	1	pulmonary	23/01/15	ongoing	--
9	32	m	1	pulmonary	28/01/15	ongoing	--
10	28	m	1	pulmonary	07/03/15	ongoing	-
11	35	m	1	pulmonary	20/03/15	ongoing	--

f) Sanitation programme (water access)

In 2014/15 two tube wells have been installed in Santal villages where water was scarce. The target is to improve water access and therewith hygiene and finally health. The tube wells have been installed in Ghosaldanga and Bautijol. The water is now being used to clean the body and for house work purposes like cooking, cleaning and watering the vegetable gardens.

3. Ambulance Car

In a common project with the Rotarians in Bolpur and Rotarians in Germany (Abstatt-Lauffen) Shining Eyes India has received an ambulance car for the health check ups in the tribal villages and for transport to St. Mary's Child & Mother Health Care Centre. From there to other diagnostic centres and hospital for a further treatment of the village patients can be connected.

4. Trustees

The Trustees remained in the year of 2014/15 as per the starting point of this charitable trust one year earlier. The following list presents the Trustees and their designations:

	Name	Designation	Profession
1	Dr. Monika Golembiewski	President	Medical practitioner
2	Satyanarayan Roy	Treasurer /settlor	Service
3	Snehadri Shekar Chakraborty	Secretary /settlor	Service
4	Prof. Dr. Swapan Mukhopadhyay	Trustee	Medical practitioner
5	Dr. Sujit Kumar Paul	Trustee	Service

The overall goal of this charitable trust is to provide medical care mainly to the needy children and mothers in the rural area. This includes presently curative measures and village health checkups as well as preventive programmes to improve nutrition and hygiene. The trust works momentarily for the poor and tribal families surrounding Bolpur at Birbhum District.

The main focus is to give care for malnourished children, pregnant women and also TB patients. There is a collaboration with "St. Mary's Child and Mother Health Care Centre" at Makarampur, Bolpur. This centre is run by the Teresian Carmelite Society.

The Trust enjoys 12 AA and 80G benefit.
