mission

This fire destroyed a \$500,000 home on the Arterberry Ranch in De Luz Canyon. Flames left only a chimney made of rock. The fire also destroyed a \$100,000 racing car and some outbuildings.

The 830-acre ranch is owned by Dr. William Arterberry of Los Angeles.

Mrs. Arterberry left the ranch home with nine other people late Tuesday night and when she returned only the rock chimney was standing on the premises. The racing car was charred wreckage.

The fire has burned over 10,000 acres of brush and grass and is now burning within 11 miles of Lake Elsinore in Riverside County.

In all, nine structures have burned and numerous citrus trees in groves located within the fire area have been lost.

More than 1,000 men are on the fire line, according to John Thurman of the state Forestry Division, who is supervising the firemen.

Also aiding were Marines, volunteer fire fighters and firemen from nearby communities including U.S. Forest Service personnel.

One extension of the fire came within eight miles of Fallbrook yesterday, fire officials said.

Additional men will be brought in California Air National Guard aircraft from Northern California today.

Equipment on the fire lines included 47 trucks, three helicopters and 17 bulldozers cutting out fire breaks.

Yesterday 10 aerial tankers bombed the fire with chemical retardants at the rate of 20,000 gallons an hour, a state forestry information officer said.

The spokesman said there appeared to be about five miles of open fire line and that the most westerly section was burning near the Margarita lookout on the San Diego County side.

The spokesman pointed out that the fire fighters were hampered by Santa Ana winds gusting from 15 to 20 miles an hour, humidity of 15 per cent and over 100 degree daytime temperatures.

He estimated the fire as about 45 per cent contained with full containment estimated at around 6 p.m. tomorrow.

2 PENDLETON FIRES

Two other brush and grass fires were burning out of control on the Marine base at Camp Pendleton.

One fire started Monday afternoon on the northwest section of the base and has burned about 12,000 acres. Information officers at the base said the fire was started by a flare used in a training exercise. No structures have been burned and no buildings are in the vicinity.

The other fire on the Pendleton base started yesterday afternoon at Camp Las Pulgas. It was started when a generator exploded. No one was injured. The number of acres burned over has not been determined and containment is expected early today, a Marine spokesman said. Both fires were being fought by civilian firemen at the base.

FIRE CONTAINED

Still another brushfire that started Monday afternoon in San Pasqual Valley has been contained after burning more than 4,000 acres, a state forestry information officer said.

The fire was contained after it burned over 4,000 acres and damaged some groves in the area.

San Diego city firemen were busy, too, yesterday. One fire burned over three acres of grass in an hour-and-a-half on Dairy Mart Road near in the South Bay Interstate 5 Battalion Chief Richard Kolb said.
