# The Effects of Microcurrent on an Animal's State of Wellbeing

According to an animal study by Ngok Cheng et al.<sup>2</sup>

Increased  
amino acid  
transport

Amino acids are the building blocks that form proteins during the process of protein synthesis.

Increased  
protein  
synthesis

Protein synthesis is the process by which cells make proteins, creating physical life from the central DNA blueprint in each cell.

Increased  
ATP  
production

ATP (adenosine triphosphate) stores energy in the cells, like gasoline in a car's tank. It is produced by mitochondria, the cell's power plants.

**1** "Individualized Microcurrent Frequencies" ("IMF") is a proprietary technology of Healy World. It uses the data from a physical noise generator to assign a priority to frequencies that professional user experience indicates have the highest relevance for the user. The duration, frequencies, intensity, frequency, naming, and the descriptions of the Individualized Microcurrent Frequency (IMF) programs are based on the practical experience of Nuno Nina and other experts and our understanding of the interaction of frequency modulated microcurrent with the Bioenergetic Field. They have not been confirmed by independent studies. The Healy Individualized Microcurrent Frequency (IMF) programs are designed to support wellbeing through harmonization of the Bioenergetic Field. We have conducted unblinded before/after surveys in controlled and randomized groups of participants. These surveys suggest that the participants' wellbeing was higher after the application. We attribute this to the harmonization of the Bioenergetic Field, which we refer to as the energy flow of life, traditionally also called chi (or qi) and prana. This has not been confirmed by independent studies.

**2** Cheng, N., et al. (1982). The effects of electric currents on ATP generation, protein synthesis, and membrane transport in rat skin. *Clinical orthopedics and related research*, 171, 264-72. This in vitro study refers to the effects of microcurrent and the basic mechanisms on which Healy frequency programs are based. It did not include any Healy devices.

**3** The content displayed by the HealAdvisor App does not constitute medical or, in case of use with pets or other animals, veterinary advice. Such advice can only be provided by a medical or veterinary professional. The Individualized Microcurrent Frequency Healy programs are intended solely for harmonization of the Bioenergetic Field. If your animal has or you suspect your animal may have a medical condition, or if your animal is under the care of a veterinarian, you should consult the animal's veterinarian before following these recommendations. Any personal data you upload to the HealAdvisor Cloud is encrypted to protect your privacy.

**4** Information Field technology is a proprietary technology of Healy World. It is based on the theory that the Information Field is the non-material area through which spirit and matter communicate. It reflects what we consider to be the spiritual meaning of life events. The existence of such a field is discussed in scientific literature. Analysis in the Information Field is designed to search for the information patterns that contribute to the harmonization of the Information Field. For this purpose, a priority is assigned to contents such as descriptive sentences, arranged in lists, by evaluating the data of a physical noise generator. In our users' experience, this priority reflects the relevance for the user. An analysis in the Information Field reflects a combination of factors at the time the analysis is done, including the intention of the user. An analysis at a different time may have a different result due to changes in the environmental variables. The content of the HealAdvisor Analyse app databases and modules is based on the practical experience of the experts who created them. We have conducted unblinded before/after surveys in controlled and randomized groups of participants. These surveys suggest that the participants' wellbeing was higher after the application. We attribute this to the harmonization of the Information Field, which we refer to as the unified background field of the material and the mental dimensions. They have not been confirmed by independent studies.
