

SENSORY SEEDLINGS

Fun, Creative, & Mindful Sensory Play Program By Teacher Red

Sensory Seedlings offers a valuable preparation for preschool for children aged 18 to 36 months, combining play-based sensory exploration with the gentle influence of Montessori principles. The program acknowledges socio-emotional learning as a fundamental aspect of early childhood development. It serves as a treasure trove of enjoyment, education, and progress, aiming to support your child's holistic growth in a caring, mindful, and cheerful setting.

Why Socio-Emotional Learning Is Crucial?

Eases Separation Anxiety

By practicing short goodbyes and allowing parents to stay nearby, we build trust and security, showing children that when parents leave, they always return.

Improves Social & Stranger Anxiety

Through group activities and positive interactions, children learn to feel comfortable and safe around new faces.

Promotes Positive Discipline & Mental Health

We advocate for understanding and addressing behaviors & emotions healthily, acknowledging the significance of mental well-being alongside physical health.

Program Highlights
