

RUSSELL STONE PRODUCTS

We are commonly asked, what are your capabilities? At Russell Stone Products we feel your imagination is your only limitation. We have attached only a few of the different projects that we have worked on in recent years and hope that they give you an idea of what we can produce. The physical characteristics of our Class 2 Quartzitic sandstone allow us to produce products that have a distinctive natural beauty and can withstand the elements. The following photographs demonstrate its durability, beauty, and the craftsmanship of our employees and the masons who installed it.

Our craftsmen give us the ability to produce almost every cladding requirement on a structure.

Our stone can be fabricated to use in a variety of applications, both inside and out. From large buildings to indoor spaces.

Our quarry has been in existence since the early 1800's. The Rockville bridge in Harrisburg Pa was completed in 1902 and is still in operation today after withstanding extreme freeze and thaw conditions for over 100 years.

After stone samples from dozens of suppliers in the United States and Canada failed to qualify, our Class 2 stone was chosen to be used on canals in Canada because of its ability to withstand extreme freeze and thaw conditions. A testament to the durability of our product..

Barn Stone, Pin and Feathered Blocks, Machine Split 6 sides

Our stone is available in a variety of colors and can be polished to different degrees of shine.**

The Chapel at Princeton University, one of the many historical buildings that we have had the privilege of supplying the stone that was used in its restoration.

Wall and floor cladding, inside and out!

Trim and accent pieces, pavers, landscaping and streetscaping just to name a few of the various methods of our stones use. Our stone has the ability to not absorb an intense amount heat making it a great product for patios and walkways. It is quite possibly one of the only sandstones you can walk across in your bare feet in the extreme summer heat

Solid stone benches are available in a variety of colors and finishes. They can be custom cut and sized to your needs. We have the capabilities to produce much larger benches than our competitors because our Class 2 Sandstone has the characteristics to be quarried in much larger blocks than most quarries.

Craftsmanship at its Finest!

Homes and Buildings Big and Small

Your Imagination is your only Limitation!

Remember, no project is too big or too small. We can handle your project of any size with our world renowned team. Call us today with questions or ideas you might have for any upcoming projects.

Let us help you get your next project underway.
