

RUSSELL STONE PRODUCTS

Russell Stone Products is proud to announce that with recent testing and study's done by the Natural Stone Institute our stone had been classified as a TYPE 111 EPD. (Environmental Product Declaration)

Our stone is an easy solution to green building goals. It is a single ingredient natural material that emits no VOCs, and poses no health hazards. Our stones durability allows it to perform impeccably in exterior and interior applications both residential and commercial. Our stone has also satisfied the physical requirements for a Class 2 Quartzitic Sandstone. Our stone has long shown its durability in freeze and thaw conditions. **

Throughout history we've seen our stone used in iconic structures symbolizing strength and permanence. New materials strive to mimic stones beauty, but none can compare.

As a single-ingredient, natural material, that emits no VOCs, it is also a healthy choice for interior spaces.

Natural stone is a low-carbon product as it is nearly complete as a building material in its natural state. To transform this raw material into a useable dimensional unit requires a minimal amount of energy

Your Imagination is your only Limitation!

Remember, no project is too big or too small. We can handle your project of any size with our world renowned team. Call us today with questions or ideas you might have for any upcoming projects.

Let us help you get your next project underway.
